

Central and South West England and Wales

PROJECT PROPOSAL

Introduction

Show what the basic bid is for

Outline the objectives of the bid

Outline the expected outcomes

To pilot the role of a design
(25 hours per week) within
post-holder will also be working
other organisations

To improve the level of rehabilitation
in-patients at Poole Hospital
maximum functional potential
thereby helping to improve
discharge

Particular emphasis would be on
cord compressions. By developing
pathway approach to the management
earlier physiotherapy intervention
risks associated with prolonged
functional ability and level
Increasing the physiotherapy
wards, would enable the physiotherapists
integral members of the ward
for collaborative working and

As a senior physiotherapist
to establish links with physiotherapy
palliative care centres in
are established and an equipment
offered to all patients transferred

To explore the potential of
that would offer follow-up
as well as providing input
were in-patients. The need
explored with collation of
number of oncology patients
service

To work towards providing a
to oncology patients across
boundaries thereby giving a

Increasing the level of physiotherapy
wards would improve the access
more patients to receive rehabilitation
their level of function the
straightforward

There would be enhanced working
physiotherapists and nursing
oncology wards allowing physiotherapy
more patient focused and to

By increasing the physiotherapy
of rehabilitation would improve
members of the MDT being engaged
delivery of rehabilitation

A standard approach to the management
spinal cord compressions in
provided with earlier mobilisation
those with no spinal instability

Implications if the bid is unsuccessful

Background

Outline existing provision (attach GAP analysis if available and appropriate)

Describe the context (relationship to PCT, Trust, Network)

Describe how the project fits with current thinking / policies at local, regional, Network and national level

more straight forward discharge
For those patients being discharged
centre, there would be a model
service across Dorset with
patient-focused and evidence
A clear role for physiotherapy
patients, as in-patients and
post discharge would be identified
would be written outlining
demonstrating the benefits
well as the community
In the all of the previously
the views of patients, care
professionals would be consulted
The physiotherapy department
limited service to the oncology
acute / urgent referrals of
with little ward integration
opportunities

The physiotherapy service for
service to the oncology wards
dedicated to these wards. A
a week of a specialist physiotherapist
the oncology wards. With the
little scope for developing
collaborations with other oncology
Poole Hospital NHS Trust is
the Dorset Cancer Network ward
centre based at the hospital
comprises of two inpatient wards
day care unit and a dedicated

In the year 2002 / 2003 there were
admissions. The physiotherapy
service to in-patients in Poole
with the Dorset Cancer Network
strategic level. There are
physiotherapy links with the
with the hospices only. This
there were better physiotherapy
ensuring that best practice
across the region

Within the operational plan
Directorate the need for additional
has been identified.
The NICE guidance on improving
care for cancer patients (2005)
physiotherapy as an important
multi-disciplinary team especially
process.
The proposed model of working
current work-force development
the breaking down of traditional
as in other aspects of health
emphasis on working collaboratively

<p>Demonstrate fit with Macmillan corporate objectives (SDM will advise)</p>	<p>other organisations, which v strategic level meetings th By working as an integral m proposal enhances the deliv wards emphasising the impor preparedness for discharge</p>
<p>Proposal Content Provide fuller details of the service / post named in the basic bid</p> <p>Describe delivery of the service</p>	<p>3-year pilot for 0.69 WTE S within the Oncology directo physiotherapist whilst base spend some time, working wi locally. The post-holder would work the 2 wards. As well as pro the immediate needs of the p would work with other healt unit establishing pathways rehabilitation and better p post holder would attend mu be a key member of the core the post-holder will also b meetings and other relevant Using established links with centres; the post-holder wo equitable physiotherapy ser The post-holder will evalua ongoing oncology physiother identifying the number of p this ongoing rehabilitation community services availabl Alison Oliver - Acute team</p>
<p>Identify project manager</p> <p>Identify key stakeholders and level of engagement to date</p>	<p>Hilary Coombes - Superintend services) Denise Lunn - Senior Nurse Gill Christian - General Ma This proposal has been disc Coombes and Denise Lunn</p>
<p>Outline proposal evaluation criteria</p>	<p>Evaluation of data relating and functional levels at di groups such as spinal cord The use of outcome measures management strategies invol palliative care centres A proposal highlighting the oncology rehabilitation pos proposal would identify the that would benefit from a s physiotherapy whilst as an after discharge In the final 6 months of the project evaluation will be</p>
<p>Outline exit strategy or approach to secure long-term funding</p>	<p>The Trust / PCT would be app channels to secure ongoing</p>

|
|
|
|
| Provide the cost profile for the project
|
|

| Should funding not be secured
| however the improvements to
| developed working with organ
| opportunity would continue
| 3 years salary of 0.69 WTE
| £23,317 p.a.
| Total = £69,951 (for the 3)
