**STANLEY PARK*****Stanley Park, Liverpool***

Elsworth, D Lancaster : Oxford Archaeology North, 2003, 45pp, pls, figs, tabs, refs

*Work undertaken by:* Oxford Archaeology North

The results of the assessment indicated that a large part of Stanley Park had been subject to a limited amount of development, although there was some potential for archaeological remains to have survived. Various parts of the site should be inspected to gauge the extent of elements of the park visible on the surface and a geophysical survey should be carried out to attempt to identify other, earlier remains. **CRANTON COLLIERY, KNOWSLEY*****Crownston Colliery, Knowsley, Merseyside***

Lee, A Lancaster : Oxford Archaeology North, 2003, 29pp, colour pls, figs, tabs, refs

*Work undertaken by:* Oxford Archaeology North

The demolition of the colliery and the subsequent landscaping of the area during the 1990s effectively removed most of the site's archaeological resource. Those elements which did survive, and merited some archaeological consideration, were the remains of the railway branch line embankment, and the areas of relatively undisturbed areas of woodland on the western side of the site. This area constituted a surviving remnant of the medieval park and may have concealed undisturbed archaeological resources from this period or earlier. [Au(abr)]
