**CITY PARK SITE*****The Proposed City Park Site, Birmingham City Centre***

Hislop, M Birmingham : Birmingham Archaeology, 2003, 22pp, colour pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the proposed site for the city library and city park. The area was agricultural in use until about the 1750s. The area was then developed up around the Digbeth branch canal and later the railway goods yard. The assessment identified that a number of 19th century structures and buildings survived within the proposed development area but that most of the area was built on during the mid 20th century. Litherland, S &amp; Nichol, K Birmingham : Birmingham Archaeology, 2003, 28pp, colour pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the proposed development site. The assessment identified that the site contained ancillary buildings associated with the flour mill and later warehouses. The site of a the former Boulton and Watt steam engine and a series of engine houses was identified as being located just outside the proposed development area. [Au(abr)]

**PEBBLE MILL, EDGBASTON*****Pebble Mill, Edgbaston, Birmingham***

Ramsey, E Birmingham : Birmingham Archaeology, 2003, 54pp, colour pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the site. The assessment identified that due to the fast flowing watercourses that ran through the site, it was used for water mills during the medieval and post-medieval period. The mill pond was identified as being truncated by the 1960s BBC television studio, but structures around the watercourses were identified as possibly surviving. [Au(abr)]

Hancox, E Birmingham : Birmingham Archaeology, 2003, 34pp, pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the proposed development area. The assessment identified that the site was within the area of a Saxon settlement, Tile Cross, which dated from c.800 to 1000 AD. A Listed Building, Sheldon Hall Farm Barn, was within the study area. The site was identified as having archaeological potential for Saxon settlement and later agricultural activity associated with the hall. [Au(abr)]

Hislop, M Birmingham : Birmingham Archaeology, 2003, 24pp, colour pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the proposed development and on the house environs. The hall was a 19th century Listed Building and its grounds incorporated the remains of St. John's priory and its associated ponds. A mound was also identified which was either spoil from canal cutting or the remains of a 12th century seige motte. [Au(abr)]

*Work undertaken by:* Birmingham Archaeology

A supplementary desk-based assessment was carried out on the site. The development area was identified as being important due to the medieval industrial activity and the massive expansion of iron and coal industries during the post-medieval period. The site was identified as having potential for archaeology surviving in discrete areas. [Au(abr)]

*Work undertaken by:* Birmingham Archaeology

An archaeological assessment was carried out on the proposed development site. The assessment identified that development of the area was limited to the Bell Street, Worcester Street/Victoria Street and Snow Hill prior to the building of St. John's church after 1750. Most of the rest of the area was developed after the building of the church and was occupied by small scale industries. The area of the development was identified as having some potential for medieval archaeology on part of the site and moderate for post-medieval deposits on most of the site. Areas were also identified that had no archaeological potential. [Au(abr)]
