Lowe, J Reading : Thames Valley Archaeological Services, 2003, 21pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

An assessment was carried out in advance of a proposed residential development. It was thought that archaeological features from all periods could have survived, in particular the Roman road Akeman Street was believed to run near or through the study area. An evaluation was recommended. [Au(abr)]

Barge, M Woodlands : Gifford & Partners, 2003, 17pp, pls, figs, tabs, refs

Work undertaken by: Gifford and Partners

There were no recorded archaeological sites in the area of the proposed redevelopment. The nearest sites were a railway station and the remains of a well which were both post-medieval in date. In addition a Roman coin was found 160m from the site. [Au(abr)]

Grant, J Hertford : Hertfordshire Archaeological Trust, 2003, 24pp, figs, tabs, refs

Work undertaken by: Hertfordshire Archaeological Trust

An assessment was carried out to determine the archaeological potential of an area of land in advance of a new school. No archaeological finds were recorded in the study area but there were a number of Listed Buildings of Victorian date and the site was considered of interest from a more recent historical perspective. The pond at the site was thought to be the possible remains of a moat, the extent of which was not known. [Au(abr)]

Atkins, R Fulbourn : Archaeological Field Unit, Cambridgeshire County Council, 2003, 12pp, figs, tabs, refs

Work undertaken by: Archaeological Field Unit, Cambridgeshire County C

A desk-based assessment was carried out on the proposed development site. Extant ridge and furrow was identified. Two pre-18th century structures were also identified as been previously present, which included the Fox and Goose public house. The public house had been demolished and the course of the road altered by the late Victorian period. [Au(abr)]

Bashford, D Oxford : Oxford Archaeology, 2003, 18pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

The potential for the site to contain archaeological deposits from the prehistoric and Roman periods was unclear, as the nature and extent of activity from these periods in Wendover was not fully understood. During the medieval and post-medieval periods the proposed development site appeared to have laid outside the burgage plots of the medieval borough, and may have been an orchard or garden. [Au(abr)]

Moore, H Reading : Thames Valley Archaeological Services, 2003, 25pp, pls, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

An assessment was carried out in response to proposals for a new housing development. The study area was found to have moderate to high potential to contain archaeological deposits relating to the Anglo-Saxon or early medieval occupation of the village. [Au(abr)]

Vaughan-Williams, A Twickenham : AOC Archaeology Group, 2003, 49pp, figs, refs

Work undertaken by: AOC Archaeology Group

The site was in an area of archaeological potential. The area sustained a fairly active population through the prehistoric period. The Roman period saw activity in the form of trade. The prosperity of High Wycombe increased steadily through the medieval and post-medieval times but evidence for these periods was unlikely to exist due to modern developments. [Au(abr)]
