MINIONS LRF PHASE II

Minions LRF Phase II, Cornwall. Archaeological Assessment

Gossip, J Truro : Cornwall Archaeological Unit, 2003, 140pp, pls, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

An assessment of historic mines of the proposed World Heritage Site in the Minions was conducted in advance of consolidation of the site. Over a hundred structures relating to the mining history were recorded. [AIP]

Worksheet for Environment: Heritage of Historic Resources

Cox, P Chicklade : AC archaeology, 2003, 2pp, tabs

Work undertaken by: AC archaeology

The preliminary assessment of resources identified three historic buildings within the study area which comprised Grade II Listed Buildings of vernacular architecture. Historic areas comprised the remnants of a parish boundary and evidence for industrial workings included sites of copper mines and stream works. Two barrows were also located in the study area which were Scheduled Ancient Monuments. [Au(abr)]

LANGHOLME, ARWENACK AVENUE

A Heritage Desk-Based Assessment of Lanholme, Arwenack Avenue, Falmouth, Cornwall

Hemley, S Twickenham : AOC Archaeology Group, 2003, 45pp, pls, figs, refs

Work undertaken by: AOC Archaeology Group

The site was in an area know to have high archaeological potential. Both medieval and post-medieval sources indicated that the site directly adjacent to the current Arwenack Manor (Grade II* Listed) was within the curtailment of the previous manor house, which had been in existence since at least the medieval period. NANCEMERE FIELDS, TRURO***Nancemere Fields, Truro, Cornwall. Archaeological Assessment***

Dudley, P Truro : Cornwall Archaeological Unit, 2003, 17pp, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

The desk-based assessment identified four documented sites; two rectangular buildings, the site of a well and the site of a former enclosure. Two areas of multiphase activity were identified by a geophysical survey. The survey revealed a group of rectilinear and sub-rectilinear enclosures with possible contemporary pits and roundhouses and a series of pre-medieval field ditches were also identified. A large sub-circular enclosure with a number of features including pits and possible roundhouses were also identified. [Au(abr)]

PENRYN, WEST STREET***Penryn, West Street, Cornwall. Archaeological Assessment***

Taylor, S Truro : Cornwall Archaeological Unit, 2003, 36pp, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

The development would cover an area of burgage plots which were of medieval origin and that were amongst the last surviving of a formerly extensive network of plots around the town centre of Penryn. Within the plots a number of features were identified from historical mapping, including removed boundaries and a number of outbuildings and greenhouses. The walk-over survey identified a lynchet and a group of terraces. [Au(abr)]

TR15 3QT**DUDNANCE LANE TO STATION ROAD***An Archaeological Assessment of the Proposed Dudnance Lane to Station Road Development Area*

Sharpe, A Truro : Cornwall Archaeological Unit, 2003, 55pp, colour pls, figs, refs

Work undertaken by: Cornwall Archaeological Unit

The area had a high potential for the survival of evidence for prehistoric settlement and other activities. The area abutted important areas of the proposed Cornish Mining World Heritage Site. The Robinson's Shaft site will be designated as a nationally important monument through scheduling and listing, whilst selected buildings at South Crofty and the Basset Foundry have been listed. Development in this area would impact on the setting of both sites. [Au(abr)]

Craze, N Truro : Cornwall Archaeological Unit, 2003, 15pp, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

The assessment identified eight sites of archaeological and historical interest. These included, most notably, the crop-mark of a roundhouse, a later prehistoric/Romano-British settlement, located at SW 6288 4019. One medieval settlement, two post-medieval settlements and post-medieval mining remains area were also located within the development area. [Au(abr)]

Taylor, S Truro : Cornwall Archaeological Unit, 2003, 20pp, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

The desk-top study identified a late prehistoric enclosure in the field to the north of the assessment area which may extended into it. Also identified were a medieval field boundary and the locations of field boundaries, trackways and a building. A geophysical survey confirmed the subsurface survival of some of the medieval field boundaries and located a small enclosure associated with these. [Au(abr)]

Baker, M V Truro : Cornwall Archaeological Unit, 2004, 39pp, pls, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

A desk-based assessment was carried out in response to a proposed sewage treatment works in the area. 28 sites were identified, including four that were thought to be of national importance, three of regional importance and 23 of local importance. Numerous boundaries and buildings and features relating to mining activity were the most prominent. Where the remains could not be preserved in situ, a detailed mitigation scheme was recommended. Taylor, S Truro : Cornwall Archaeological Unit, 2003, 27pp, figs, tabs, refs

Work undertaken by: Cornwall Archaeological Unit

The proposed development was adjacent to, and may have impacted upon, a prehistoric enclosure. The lodge itself was a Grade II Listed Building. The building of the lodge may have destroyed partially or wholly the enclosure bank at this location. The lodge and garden were in a state of dilapidation. The recommendation was to record the extant lodge and garden and to record the survival of the Iron Age enclosure bank and/or any internal features that may have been affected. [Au(abr)]

TR26 2HN**ST. IVES FLOOD DEFENCE SCHEME*****St. Ives Flood Defence Scheme. Archaeological Desk-Based Assessment***

Craze, N Truro : Cornwall Archaeological Unit, 2003, 27pp, figs, refs

Work undertaken by: Cornwall Archaeological Unit

The desk-based assessment revealed a number of sites along the route of the proposed flood defence scheme. These mainly included Listed Buildings and other elements of the built historic environment. From the schemes put forward, it appeared that certain sites and buildings could have been affected, particularly if tunnelling was undertaken. A walkover survey was also recommended to determine the scheme's impact. [Au(abr)]

PL25 3NT**CHARLESTOWN COAL YARD*****Charlestown Coal Yard, Cornwall. Archaeological Assessment***

Thomas, N Truro : Cornwall Archaeological Unit, 2003, 22pp, pls, figs, refs

Work undertaken by: Cornwall Archaeological Unit

Today the coal yard comprises a large open space, bounded by a retaining wall on its north side. Ore floors are now very rare in the UK, and the yard here was comparable to a similar one nearby, now used as a car park. If carefully designed to retain historic fabric so far as possible, it was thought that the redevelopment need not to have an adverse impact on the character of the site. [Au(abr)]
