DRYBURN HOSPITAL, DURHAM CITY

Dryburn Hospital, Durham City, Archaeological Desk-Top Assessment

Still, D Durham : University of Durham, Archaeological Services, 2003, 35pp, pls, figs, refs

Work undertaken by: University of Durham, Archaeological Services

The possible site of a prehistoric barrow at Aylkey heads, a post-medieval/medieval hospital and City gallows. The 1992 trial pit logs indicated made ground of a depth of 2m, perhaps covering any archaeological deposits that might exist in the north-east part of the site. [Au(adp)]

OLD HALL FARM, ST. HELEN AUCKLAND

Old Hall Farm, St. Helen Auckland, County Durham. Cultural Heritage Assessment

Middleton, P & Fraser, F Barnard Castle : Northern Archaeological Associates, 2003, 27pp, colour pls, figs, refs

Work undertaken by: Northern Archaeological Associates

The development lay within a designated Area of Archaeological Interest as specified in the Wear Valley Local Plan (Policy 17E). 10 sites were within the boundaries of the development, two were identified as of regional significance, Old Hall Farm and its engine house. Apart from an area of medieval ridge and furrow in the south west corner of the site, most of these sites were associated with the development of the farm. A further five sites were identified within the study area, including one Scheduled Monument, the Stockton to Darlington Railway and two Grade II Listed Buildings. The assessment recommended a program of trial trenching, topographical survey, selective archaeological excavation and a watching brief. [Au(adp)]

HEIGHTON LANE, NEWTON AYCLIFFE*An Archaeological Desk Based Assessment of Land to the South of Heighton Lane, Newton Aycliffe*

Young, J Newark : John Samuels Archaeological Consultants, 2003, 29pp, figs, refs

Work undertaken by: John Samuels Archaeological Consultants

The assessment revealed that no archaeological sites had been recorded within the proposed development area. Slight ridge and furrow, probably of medieval date, were observed on site. The closest archaeological remains were dated to the Iron Age, consisting of an enclosure, field system and settlement features recorded through archaeological evaluation. A geophysical survey was undertaken, revealing a further circular anomaly. [Au(adp)]
