Cope-Faulkner, P Sleaford : Archaeological Project Services, 2003, 28pp, figs, tabs, refs

Work undertaken by: Archaeological Project Services

An archaeological assessment was carried out on the proposed development site. The assessment identified archaeology within the assessment area from the prehistoric to modern periods. No archaeology was identified within the proposed development site, apart from impacting alluvial deposits, the development impact was seen as limited. [Au(abr)]

Cope-Faulkner, P Sleaford : Archaeological Project Services, 2003, 26pp, colour pls, figs, tabs, refs

Work undertaken by: Archaeological Project Services

An archaeological assessment was carried out on the site. This identified that the development area was within the bounds of the medieval town and that medieval archaeology had been revealed elsewhere on the High Street. Evidence for occupation of the High Street for the post-medieval period had been found and a cartographic source revealed that part of the site contained an Inn in 1784. [Au(abr)]

Tann, G Lincoln : Lindsey Archaeological Services, 2003, 32pp, figs, tabs, refs

Work undertaken by: Lindsey Archaeological Services

An archaeological assessment was carried out on the proposed gas pipeline. Much of the pipeline was routed to lower the impact on any archaeology. The Wragby end of the pipeline coincided with an Iron Age/Romano British site which has not been investigated. Medieval and Roman finds had also been recovered along the route and boundary features would also be affected by the development. [Au(abr)]

Tann, G Lincoln : Lindsey Archaeological Services, 2003, 15pp, colour pls, figs, tabs, refs

Work undertaken by: Lindsey Archaeological Services

An archaeological assessment was carried out on the proposed sewerage pipe and pumping stations. The assessment identified that the pipeline would pass through areas where 900 sherds of post-medieval pottery wasters were recovered. Further pottery would be encountered during the development and possibly the remains of pottery kilns. Also two of the pumping stations may have impacted on medieval landscape features. [Au(abr)]

MAPLETON FARM, MOOR LANE, HORSINGTON***Mapleton Farm, Moor Lane, Horsington***

Tann, G Lincoln : Lindsey Archaeological Services, 2003, 18pp, figs, tabs, refs

Work undertaken by: Lindsey Archaeological Services

An archaeological assessment was carried out on the site. The assessment revealed that the site was part of a 12th century grange farm for Stixworth Priory. Medieval pottery had been recovered from the site and earthworks for the medieval farm lay just outside the development area. The assessment identified that the development would only have a limited impact on any archaeology. [Au(abr)]

ST. MARTIN'S CHURCH, WAITHE***St. Martin's Church, Waithe, Lincs***

Tann, G & Field, N Lincoln : Lindsey Archaeological Services, 2003, 26pp, colour pls, figs, tabs, refs

Work undertaken by: Lindsey Archaeological Services

An archaeological assessment was carried out on the church and its surrounds to assess the impact of church redundancy. The assessment identified that the church tower was Saxon in date, and the rest of the church was rebuilt during the 19th century. Much of the churchyard had been rearranged due to depopulation of the village during the medieval period. Any development in the churchyard would impact on archaeology and any alterations to the church would need Listed Building consent and Scheduled Monument consent. [Au(abr)]

TOYNTON SEWERAGE SCHEME***Toynton Sewerage Scheme***

Tann, G Lincoln : Lindsey Archaeological Services, 2003, 22pp, figs, tabs, refs

Work undertaken by: Lindsey Archaeological Services

An archaeological appraisal was carried out on the proposed route of the replacement sewer and pumping houses. The sewer route was identified as possibly impacting on known and unknown pottery production sites and pottery wasters and kilns may be encountered. One of the pumping stations was identified as being located on the site of a 17th century house and medieval and post-medieval pottery had been recovered from the location. [Au(abr)]

LINCOLN EASTERN BYPASS***Lincoln Eastern Bypass***

Babtie Group Lincoln : Babtie Group, 2003, 48pp, figs, tabs, refs

Work undertaken by: Babtie Group

An archaeological assessment was made on the impact of the proposed bypass. The road route would affect alluvial and waterlogged deposits. The assessment also revealed that even if the archaeology was protected in situ by an embankment, future development would isolate the archaeology and the embankment would dry out any waterlogged deposits. The assessment identified that archaeology from all periods may be affected by the development. [Au(abr)]
