Laidlaw, M Chicklade : AC archaeology, 2003, 20pp, colour pls, figs, tabs, refs

*Work undertaken by:* AC archaeology

The site lay within an area of archaeological potential from all prehistoric and historic periods. This was mainly represented by the Bonze Age, Saxon, medieval and post-medieval settlement activity. In addition, nine Listed Buildings were in the study area. Activity within the site was limited to post-medieval brickworks and disturbed human remains. [Au(abr)]

*Work undertaken by:* Archaeology South-East

The appraisal area comprised two arable fields lying on the Lower Greensand adjacent to a known medieval house (Backsettown) and a medieval road. Existing records suggested that the site had the potential for containing archaeological deposits of Roman and medieval date. Further evidence of prehistoric date might also be expected. [Au(abr)]
