Annis, R. Durham : University of Durham, Archaeological Services, 2003, 40pp, figs, refs

*Work undertaken by:* University of Durham, Archaeological Services

Assessment of the site found that there was no likelihood of any archaeological deposits or remains predating the modern period remaining in the study area. The survey provided a record of the site in September 2003, and described how much original surface detail, together with all portable or saleable material that might have survived in the past, had been stripped or destroyed.
