Martin, M Birmingham : Birmingham Archaeology, 2003, 24pp, colour pls, figs, tabs, refs

Work undertaken by: Birmingham Archaeology

Trial trenches were excavated on the proposed development site. The former pre-18th century meander route of the River Rea was identified, along with the former river bank. The alluvial deposits were cut by structures associated with a row of buildings used for the toy making during 19th century. The deposits were also cut by structural remains of the mid 20th century Phosphor Bronze factory. [Au(abr)]

Work undertaken by: Marches Archaeology

Evaluation trenches were excavated within the castle bailey and near the reptile house and penguin enclosure. Within the bailey two masonry walls of 18th century date were identified, relating to a previously unidentified building that abutted the walls. Post-medieval and medieval deposits were also identified. Outside the bailey traces of part of the medieval moat were identified. [Au(abr)]

Roper, S & Watson, S Ironbridge : Ironbridge Archaeology, 2003, 36pp, colour pls, figs, tabs, refs
Work undertaken by: Ironbridge Archaeology

Evaluation trenches were excavated on the site on the proposed development site. Evidence of 18th/19th century terrace houses were identified in the form of cellars and the remains of outbuildings. No finds were recovered prior to the 17th century and no evidence of medieval settlement was encountered. [Au(abr)]
