PO30 4HT**BOWCOMBE FARM BUSINESS PARK, CARISBROOKE***An Archaeological Evaluation at Bowcombe Farm Business Park, Carisbrooke*

Trott, K Newport : Kevin Trott Archaeological Services, 2003, 17pp, figs, tabs, refs

Work undertaken by: Kevin Trott Archaeological Services

The evaluation revealed two midden deposits, one of Late Iron Age date in trench one and an early Roman deposit in trenches six and seven. The abraded Roman material in trenches three, four and five could have represented Roman ploughsoils situated in the western portion of the site. Trench two produced no dateable artefacts. The soil deposits encountered under probable Roman cultivation soils (in trenches three, four and five) may have been prehistoric in date. [Au(adp)]

PO30 3AN**HASELEY MANOR, ARRETON***An Archaeological Evaluation at Haseley Manor, Arreton*

Trott, K & Dr. Scaife, R Newport : Kevin Trott Archaeological Services, 2003, 18pp, figs, refs

Work undertaken by: Kevin Trott Archaeological Services

The evaluation revealed no archaeological remains and only slight post-medieval and modern activity in the northern portion of the floodplain site. This consisted of a bank and ditch from a late 19th century field boundary, a series of land drains associated with the draining of the floodplain and also a discrete area of slate and brick dumping likely to have been associated with Haseley Manor. Variations in the natural flood plain geology and the overlying subsoil were recorded in coring work. The information was useful in relation to understanding the past vegetation and past distribution of the Island's woodland. [Au(adp)]
