Trial trenches were excavated on the proposed development site. Five phases of activity were identified. Phase one consisted of prehistoric/Iron Age structural and industrial features. Phase two consisted of Late Iron Age/Roman enclosures, driveways and a possible roundhouse. Phase four of the site consisted of 1st-2nd century ditches. Phase four of the site consisted of a 4th century Roman settlement, comprising of ditches, structures and possible buildings. Phase five of the site consisted of two post-medieval linear features. The evaluation revealed archaeological features in the form of a pit and ditch. Pottery and flints from these were dated to the Bronze Age, indicating that the site is on the edge of an area of prehistoric activity. Additionally, a probable Medieval boundary ditch, a number of undated pits and an undated ditch were also investigated. [Au(abr)]

An evaluation was carried out as part of a BBC documentary after metal-detecting on the site had revealed a number of Saxon finds. In the southern half of the site a post-medieval feature was discovered with occasional pits of Iron Age date. A charcoal horizon containing animal bone was identified in the northern part of the site, and was assumed to be an occupation layer. A probable 7th century post-in-trench hall building was the most notable feature recorded during the excavation, along with two possible sunken-featured buildings. A sparse pottery assemblage indicated a 7th century date. [Au(abr)]

Work undertaken by: Suffolk County Council Archaeological Service

An evaluation was carried out in advance of a proposed housing estate. Six trenches were excavated, and revealed areas of archaeological potential. An occupation horizon or buried soil that contained artefacts dating from the Mesolithic to the Iron Age was encountered on the north-east edge of the site, as well as another feature with finds of prehistoric and Saxon date. Modern disturbances were noted on the site, however despite this a pit of possible Early Saxon or medieval date survived. A series of undated features were also recorded. [Au(abr)]
