FAVERDALE EAST BUSINESS PARK, DARLINGTON***An Archaeological Evaluation (Phase 1) at Faverdale East Business Park, Darlington***

Allen, E London : Pre-Construct Archaeology Ltd., 2003, 154pp, figs, tabs, refs

Work undertaken by: Pre-Construct Archaeology Ltd.

Phase one of the evaluation consisted of 50 trenches. Medieval ridge and furrow, two post-medieval boundary ditches, an alluvial deposit, a silted pond and a possible paleochannel were recorded. The general paucity of cultural material encountered suggested that the area had only ever been utilised for agricultural purposes. [Au(adp)]

KENDREW STREET CAR PARKS, DARLINGTON***Kendrew Street car parks, Darlington, Archaeological Evaluation***

Still, D Durham : University of Durham, Archaeological Services, 2003, 9pp, figs, tabs, refs

Work undertaken by: University of Durham, Archaeological Services

The evaluation by two trial trenches revealed modern brick walls, demolition levelling layers, and a tarmac surface. No archaeological deposits were identified. [Au(adp)]

QUEEN ELIZABETH II COLLEGE***Queen Elizabeth II College, Darlington, Archaeological Evaluation and Architectural recording***

Douglas, M Durham : University of Durham, Archaeological Services, 2003, 7pp, colour pls, figs

Work undertaken by: University of Durham, Archaeological Services

The works consisted of a photographic survey of the Drama Centre Building and two WWII concrete air-raid shelters, and the excavation of two trial trenches. The photographic survey provided a visual record of the site, and the trial trenches revealed no evidence of any earlier occupation or use of the site, apart from a modern land drain. [Au(adp)]

HAUGHTON GREEN***Haughton Green, Haughton-Le-Skerne, Archaeological Evaluation***

Platell, A Durham : University of Durham, Archaeological Services, 2003, 12pp, figs, tabs, refs

Work undertaken by: University of Durham, Archaeological Services

Three trenches exposed one undated boundary ditch and showed that on some parts of the site, natural deposits lay immediately below the topsoil while in other areas the post-medieval soil build up is thicker than the proposed new building foundations and therefore earlier deposits would not be affected. [Au(adp)]
