TS13 4NS**HALL FARM, EASINGTON*****Hall Farm, Saltburn: the Results of Archaeological Evaluation***

Sherlock, S Hartlepool : Tees Archaeology, 2003, 1p

Work undertaken by: Tees Archaeology

A single trial trench was excavated on the footprint of a proposed new dwelling. A number of archaeological features were excavated representing the remains of a medieval building and its enclosing garth. Pottery from the site dated to the 14th century. A follow up watching brief was proposed. [Au(abr)]

Work undertaken by: Blaise Vyner Consultancy

Evaluation excavation has revealed that archaeological features, perhaps representing the remains of a house and/or its enclosing garth, survive cutting into the clay at the north of the site adjacent to Hall Farm, Easington. Evidence for the construction and revetment of what may be a house platform have been found to the south, adjacent to the road. Pottery associated with the archaeological features suggested that they were of medieval date, probably belonging to the 14th century. [Au(adp)]

Claydon, M Durham : University of Durham, Archaeological Services, 2004, 20pp, figs, tabs, refs

Work undertaken by: University of Durham, Archaeological Services

Five trenches were excavated across the site. Trenches one and two were located in the west end of the field, adjacent to the road and produced little evidence for archaeological deposits. Trenches three-five were located further into the field and located a cobbled surface of medieval or post-medieval date to the north and a series of parallel medieval boundary ditches and gullies running across the field on a N-S alignment. A deep medieval holloway also ran through the site on a N-S alignment; tightly packed cobbles paved the base. [Au(adp)]
