8 THE GREEN WOLVISTON***Archaeological Evaluation at 8 The Green, Wolviston, Stockton-on-Tees***

Grahame, R Hartlepool : Tees Archaeology, 2003, 20pp, figs, refs

Work undertaken by: Tees Archaeology

Two trenches were excavated in the area of the proposed development: these recovered nothing of archaeological interest except several abraded sherds of medieval pottery. [Au(abr)]

COWPEN BEWLEY TO WARDEN LAW GAS PIPELINE***Cowpen Bewley to Warden Law Gas Pipeline, County Durham. Evaluation and Topographic Survey***

Middleton, P, Young, G & Robinson, G Barnard Castle : Northern Archaeological Associates, 2004, 54pp, figs , refs

Work undertaken by: Northern Archaeological Associates

The archaeological work was undertaken along the 30 km route of a gas pipeline, and consisted of topographical surveys at High Stotfold Farm, High Crow's House, Sheraton Grange Farm and Hart Bushes Hall, and evaluation by trial trench at High Stotfold Farm, Wodd View Farm, High Haswell Farm, Pig Hill, Bracken Hill and Great Eppleton. Twenty-five trial trenches were excavated, numbered consecutively along the pipeline routes, trenches 16-20 were allocated out of sequence as the site they were intended to investigate, (Wood View Farm) was identified late in the allocation process. The trenches were originally intended to be between 15 and 30m in length and were nominally 2m wide. Features found included ridge and furrow earthworks, a possible medieval farmstead, plough furrows, an Iron Age settlement, and medieval ditches. [Au(adp)]

FRIEND'S MEETING HOUSE, NORTON***Archaeological Evaluation at the Friends Meeting House, 50 The Green, Norton***

Bartlett, D Hartlepool : Tees Archaeology, 2003, 10pp, figs, refs

Work undertaken by: Tees Archaeology

A single trench was excavated in the area of the extension: this recovered a cobbled surface that predated the construction of a Friends Meeting House in the 17th century and building debris associated with the existing building. [Au(abr)]

Claydon, M Durham : University of Durham, Archaeological Services, 2004, 23pp, figs, tabs, refs
Work undertaken by: University of Durham, Archaeological Services

Seven trenches provided archaeological evidence for several periods. A ring ditch and possible associated post holes revealed in trench one were probably of prehistoric date, as was a cremation burial uncovered in trench four. A spearhead recovered from a double ditch located in trench five was probably from the Saxon period, as was a cremation burial uncovered in trench six, probably from the same double ditch? Unstratified medieval pottery was recovered from trenches one, two and six, and plough furrows running north-south across the site are believed to have been medieval or post-medieval in date.
