Work undertaken by: Worcestershire County Council Historic Environment

Fieldwalking was carried out on two fields within the proposed quarry extension area. Three worked Neolithic flints were recovered. Clear evidence of a Roman settlement was also identified with a concentration of domestic debris in the centre of the evaluation area, which corresponded with previous geophysical work on the site. [Au(abr)]

Work undertaken by: Mike Napthan Archaeology

A single evaluation was carried out on the site of a medieval bastion and part of the city wall. Remains of the 13th century city wall and the 12th-14th century city bastion were identified. A rampart was identified being cut by the bastion, which contained substantial amounts of Roman artefacts and was dated to the early medieval period. The associated ditch of the rampart contained Roman period slag and burnt daub. [Au(abr)]

Two evaluation trenches were excavated on the site. The trenches were placed to intercept the course of a Roman Road. The road was not located but deposits, pits, gravel surfaces and a stake-built structure all of Roman date were identified. These deposits were sealed by Post-Roman 'black earth' deposits. The remains of a Civil War defensive ditch were also identified. [Au(abr)]
