Work undertaken by: Albion Archaeology

An archaeological watching brief revealed the legs, pelvis and part of the torso of a single human skeleton. Some re-used stonework, probably originally forming burial plot markers was also recovered from the mixed subsoil which also contained post-medieval pottery. Detail of the churchyard wall, where it was dismantled to allow the construction of the access, was also recorded. [Au(abr)]

Albion Archaeology Bedford : Albion Archaeology, 2003, 22pp, colour pls, figs, refs

Work undertaken by: Albion Archaeology

The excavation of the by-pass channel was monitored. The trench exposed a sequence of deposits including a waterborne deposit and a lower organic deposit containing preserved wood. This lower deposit was extensive and appears to fill the lower portion of an old water course. No dateable artefacts were recovered from this deposits. No definite dating for the bridge was obtained during the watching brief, though it is thought to be Victorian, as it was in this period that the land parcels on either side were merged under a single ownership, probably post-1851. Work undertaken by: Albion Archaeology

Excavation to the north of the 18th and 19th century lodge at the Park, Moggerhanger, Bedfordshire, has largely supported the recorded and postulated sequence of architectural alterations made to the building by Sir John Soane in the 19th century. Excavation in this instance, however, revealed greater details of the nature, function and form of the successive works and rendered some detail as to the disposition of the lodge prior to Soane's engagement as architect in 1787. Luke, M, Preece, T & Wells, J Bedford : Albion Archaeology, 2003, 24pp, figs

Work undertaken by: Albion Archaeology

Two ditched enclosures were located, both continuing beyond the current limit of gravel extraction. The absence of domestic debris from the enclosures suggests that they were not associated with occupation. A larger pit was located to the north of the southern enclosure and may have been contemporary. An area of post-medieval quarry pits was located to the east of the investigation area. [Au(abr)]
