Duncan, M Birmingham : Birmingham Archaeology, 2004, 36pp, pls, figs, tabs, refs

*Work undertaken by:* Birmingham Archaeology

A trial excavation and area excavation was carried out on the site. A 12th-13th century burgrave plot, containing the remains of stone lined drains and light industrial material was identified. In the 14th century the town was levelled out and gullies and beam slots were identified on the site from this period. The site was abandoned in the late medieval period and the next use of the site was the building of a mill in the 18th century. [Au(abr)]

*Work undertaken by:* Birmingham Archaeology

Test-pitting, trial trenching, open area excavation and sieving was carried out on the proposed development site. No archaeological features were identified on the site but 416 flint/chert were recovered, 296 were worked. The tools comprised of discoidal scrapers, end scrapers, serrated flakes, bradelets, retouched pieces and microliths. The technology was possibly geared to bradelet production with crested blades, bradelet core trimming flakes and bradelet cored. The assemblage possibly represents a Late Mesolithic hunting camp or base camp or winter camp. [Au(abr)]
