Hyam, A           Leicester : University of Leicester Archaeological Services, 2003, 7pp, refs

*Work undertaken by:* University of Leicester Archaeological Services

There was high potential for buried archaeological remains as the site incorporated a moat which is a Scheduled Monument. A shallow pathway 0.15 to 0.2m in depth was excavated in a circular route to the west of the Moat revealing mid grey-brown topsoil on top of grey-brown silty loam subsoil. No archaeological features were observed. Foundations for a site access bridge and gates were also excavated revealing dark brown silty loam above the natural substrate of orange-brown silty clay. No archaeological features or deposits were recorded. [Au(adp)]

*Work undertaken by:* TR Projects

A watching brief recorded the areas which were to be effected by the renovation of a post-medieval house. Proposed work involved the removal of a modern, art deco style fireplace and a modern staircase as well as stabilising the walls in the west gable of the house. Recording revealed that at 'some time in history' the western part of the house may have contained a small hearth use for industrial activity at first floor level. [Au(adp)]

*Work undertaken by:* University of Leicester Archaeological Services

Extensive earthworks were identified during a watching brief for groundworks for a playing field at Dunton Bassett School. These, together with quantities of medieval pottery, suggested a possible medieval settlement site within the development area. The earthwork survey produced a plan of the earthworks in the immediate area of the development. [Au(adp)]
