A watching brief was carried out during the construction of a boat ramp for the Environment Agency. A layer of gravel was recorded that was thought to be a path to the probable medieval ferry, and was at the time still in use as a footpath. Blocks of Bath stone and rotting planks, one with a post-medieval patch lock still attached, showed the continuation of the use of the site until relatively recent times. [Au(abr)]

A watching brief was undertaken after a field survey identified earthworks of an archaeological nature. Several archaeological features were encountered during the replacement of a mains sewer, including a metalled footpath and three hollows filled with domestic and/or mining waste. Dating evidence was minimal but the indications were that the features were all of 19th and 20th century origin. [Au(abr)]

A trench to receive a replacement power supply was excavated in an area where Roman remains have been found in the past. The vast majority of the trench excavated revealed no features or finds. Four small agricultural ditches of unknown date were recorded, and a small area of occupation debris south of the mast was thought to be Roman. [Au(abr)]
