Lisboa, IMilton Keynes : Archaeologica, 2003, 40pp, figs, tabs, refs

*Work undertaken by:* Archaeologica

A robber trench and associated gravel surface/floor, of medieval date were identified. Three medieval cess pits, rubbish pits and a wall running east-west were identified. A substantial quantity of pottery was recovered. Two, possibly parallel ditches running north-south were also present and were cut by the medieval features. [Au(abr)]

Lisboa, I Milton Keynes : Archaeologica, 2003, 15pp, figs, tabs

*Work undertaken by:* Archaeologica

A building and a clay floor was identified with shallow limestone foundations. No direct dating evidence was found in association. A substantial ditch running approximately north-south was identified in the east of the site. No finds were recovered from its fill which had been partially destroyed by the trench of modern pipe. It seemed to follow the line of the boundary of the gardens of the 19th century though it ran to the south of it. It may have been the previous boundary when the garden was more extensive. [Au(abr)]

During the watching brief no features relating to either the canal or railway were exposed though it was noted that the ground had been disturbed down to a depth of c.1.1m at the southern end of the site, probably in the 18th or 19th centuries. It was possible that the disturbed/re-deposited clay seen in the footing trenches was the spoils from construction of the canal basin. [Au(abr)]

At the entrance to the farm complexes two north-south ditches were located. Within the confines of the farmyard the trench revealed only a shallow layer of overburden above the natural limestone. Exceptions to this were an east-west ditch near the southern limit of the farm yard and a series of plough furrows in the barns. A second phase of work involved observing the removal of topsoil from the car park to the east of the farm complex. The major ditches seen in the earlier work were observed to continue across the area. The base of an east-west wall cutting the ditches was also identified. [Au(abr)]
