LAND AT TENDLEY QUARRY, NEAR COCKERMOUTH

Land at Tendley Quarry, Near Cockermouth, Cumbria. Geophysical Survey

Webb, A Morley : Archaeological Services WYAS, 2003, 15pp, figs, refs

Work undertaken by: Archaeological Services WYAS

A gradiometer survey was carried out in advance of a proposed extension to the limestone quarry south-west of Cockermouth. Linear anomalies were indicative of a ridge and furrow system and numerous 'iron spike' anomalies near the centre of the site could have been ploughed archaeological artefacts. The presence of numerous patches of nettles in the same broad area could have suggested a more recent origin. [Au(adp)]

NEW COWPER FARM, NEAR ASPATRIA

New Cowper Farm, Near Aspatria, Cumbria. Geophysical Survey

Hancock, A Morley : Archaeological Services WYAS, 2003, 15pp, figs, refs

Work undertaken by: Archaeological Services WYAS

A gradiometer survey was carried out in advance of a proposed extension to a sand quarry north-west of Aspatria. A linear anomaly indicative of a ditch was identified as well as small magnetic enhancements and a curvilinear feature, all of which could have been archaeological in nature. [Au(adp)]

KIRBY THORPE ROMAN FORT

Geophysical Survey of Kirby Thorpe Roman Fort, Cumbria

Railton, M Cumbria : Martin Railton, 2003, 9pp, figs, refs

Work undertaken by: Martin Railton

The site was a Scheduled Ancient Monument, a Roman fort. The resistance survey located the perimeter of the fort and confirmed the presence of an entrance, as suggested by aerial photography. Some tentative conclusions about the general layout of the interior were also reached; it appeared that a road running from the north-west entrance terminated at the location of the headquarters building, and possible barrack blocks were observed. [Au(adp)]

CUNSEY BECK FORGE

Cunsey Beck Forge, Geophysical Survey, February 2003

Brroks, IGwynedd : Engineering Archaeological Services Ltd., 2003, 11pp, figs, refs

Work undertaken by: Engineering Archaeological Services Ltd.

Several areas of magnetic disturbance were recorded within the building. A coherent anomaly, outside the building, may have represented the site of an earlier furnace. [Au(abr)]
