BALDOCK BYPASS, BALDOCK

Baldock Bypass, Baldock, Hertfordshire. Geophysical Survey

Hancock, A Morley : Archaeological Services WYAS, 2003, 21pp, figs, refs

Work undertaken by: Archaeological Services WYAS

A detailed gradiometer survey was carried out at two locations either within or immediately adjacent to the corridor delimiting the route of the Baldock Bypass. At the northern site, linear anomalies were identified which if interpreted as ditches could have defined the area known to have burials which were identified in previous excavations. Individual graves were not identified by the survey even when taken at close interval readings. Ditch features previously seen in trial trenches at the southern site were identified as linear anomalies on the survey results although it was unclear whether they intersected.
