LAND AT ROCK COTTAGES, HAM GREEN, EASTON-IN-GARDANO

Land at Rock Cottages, Ham Green, Easton-in-Gordano, North Somerset. An Archaeological Geophysical Survey

Context One Archaeological Services East Stour : Context One Archaeological Services, 2003,
11pp, figs

Work undertaken by: Context One Archaeological Services

A survey was conducted due to a proposal to construct pipelines and an associated water pumping station. A medieval pottery kiln had been previously excavated within the site and there was another possible kiln nearby. Some anomalies could have represented parts of this process such as kiln walls and pottery wasters. Other general linear features, possibly archaeological, were also identified within the study area. [Au(adp)]

Archaeological periods represented: MD, UD
