GERMANY BECK, FULFORD***Germany Beck, Fulford, Near York. Geophysical Survey***

Archaeological Services WYAS Leeds : Archaeological Services WYAS, 2003, 16pp, figs, refs

Work undertaken by: Archaeological Services WYAS

A geophysical (fluxgate gradiometer) survey, covering 3 hectares was carried out on land south of Germany Beck, Fulford, where it was proposed to construct a flood channel. Several weak, discontinuous linear anomalies on varying alignments were identified as well as four discrete area of magnetic enhancement. These anomalies could have been caused by infilled archaeological features but without supporting information, a definitive interpretation could not be given. It was not clear whether the location of any of these anomalies corresponds with known crop marks. [Au(abr)]

UNIVERSITY OF YORK, HESLINGTON EAST***University of York Heslington East Development, Archaeological Geophysical Survey Phases 1 & 2***

Bartlett, A Consett : GeoQuest Associates, 2003, 37pp, figs, refs

Work undertaken by: GeoQuest Associates

Much of the survey produced a pattern of linear markings which probably represented traces of ridge and furrow cultivation, together with the effects of more recent ploughing. Land drains were also detected in some parts of the site. Other findings of a possible archaeological relevance included a group of magnetic anomalies which could perhaps have indicated a cluster of pits. [Au(adp)]
