Shelley, A Norwich : Norfolk Archaeological Unit

, 2005, 18pp, figs, tabs, refs

*Work undertaken by:* Norfolk Archaeological Unit

An excavation beside High Street in Dereham revealed several features which may have been dug in the Early Saxon period. Subsequently, the site appears to have remains vacant until the 13th century, when a simple earth-fast timber building, with an associated yard and outbuilding, was established on the street frontage. This building may have continued in use throughout the medieval and post-medieval periods, only being replaced in the 19th century when the Oxford Inn was built. In the 20th century the site was developed as a sales and service centre for motor vehicles. [Au]

*Work undertaken by:* Suffolk County Council Archaeological Service

An archaeological excavation was carried out on the site. The excavation was targeted on an area of prehistoric archaeology identified in an earlier evaluation. Forty-eight features were identified associated with a buried soil, that may have formed a Bronze Age burial mound. The site was identified as a Bronze Age/Iron Age funerary site, containing one Bronze Age inhumation, nine cremations and a scatter of pits. One of the cremations was in an Early Bronze Age urn, two were carbon dated to the Late Bronze Age and remainder were dated to the Mid/Late Iron Age. A large medieval pit was also found. [Au(abr)]

*Work undertaken by:* Suffolk County Council Archaeological Service

An archaeological excavation was carried out on the site. The initial phase involved the mechanical excavation of the upper layers and overburden. The site was divided into 2m squares, from which ten bucket samples were sieved. Roman, Saxon, medieval and post-medieval finds were recovered. The second phase involved the mechanical excavation down to the natural gravel/sand subsoil. A complex of ditches, a sunken track, a timber lined well, an oven, a pottery kiln and an enclosure delimited by post holes, all of Roman date were identified. Five Saxon sunken houses, three post hole buildings and a series of pits all dating to the Late Saxon period were also identified. [Au(abr)]
