BURY GREEN FARM, CHESHUNT***Bury Green Farm, Cheshunt***

Bourn, R London : CgMs, 2002, 16pp, figs, tabs

Work undertaken by: CgMs

An archaeological assessment was carried out on the site. No archaeology is known for the site and although the site is close to a Roman Road, the potential for archaeology was low. [Au(abr)]

Work undertaken by: Museum of London Archaeology Service

An archaeological assessment was carried out on the proposed development site. The assessment concluded that there was no known archaeology on the site but the site's proximity to a Roman villa and Saxon/medieval structures, means there is potential for archaeology. Further work was recommended. [Au(abr)]

Melikian, M Twickenham : AOC Archaeology Group, 2002, 34 pp, figs, refs

Work undertaken by: AOC Archaeology Group

A review of the documentary, geological, and archival and cartographic sources has indicated the site lies within an area known to have archaeological potential, particularly for the prehistoric and Roman periods. The project would be likely to require field evaluation works as a condition of the outline planning consent. [Au(abr)]

Much of the Roman settlement had been built over by GlaxoSmithKline, but archaeological remains have been found over a wider area. A medieval settlement was located further to the east, near the parish church of St Mary. The present buildings, located within a Conservation Area, were constructed between 1845 and 1852, and Listed. [Au(adp)]

Work undertaken by: Hertfordshire Archaeological Trust

An archaeological impact assessment was carried out on the proposed development site. The assessment found that the site had been built up since at least the 17th century, though many of the historic buildings were destroyed in the 19th century. The current buildings include a Victorian house and storage buildings, heavily altered in the 20th century. [Au(abr)]

Prosser, L Hertford : Hertfordshire Archaeological Trust, 2002, 35pp, figs, tabs, refs

Work undertaken by: Hertfordshire Archaeological Trust

Chance discoveries since the early 19th century have indicated the potential of the site for archaeological remains. A Roman vicus or small town, had been identified in the area from excavations since 1976. This appeared to involve domestic and industrial activity along the course of the main Ermine Street, as well as extending into some back plots. A possible road-side shrine or temple has been postulated, and several peripheral cemeteries identified. This assessment has suggested that the area was still extremely rich in archaeological remains, especially from the Roman period. [Au(abr)]

Francis, A London : Museum of London Archaeology Service, 2002, 31pp, figs, tabs

Work undertaken by: Museum of London Archaeology Service

An archaeological assessment was carried out on the proposed redevelopment site. The site was identified as being fields prior to the construction of the railway. Augering deposits suggest the site may have been on a former course of the nearby river. A Roman Road may also have crossed part of the site. The assessment concluded that the potential for archaeology on the site was low to medium. [Au(abr)]

O'Brien, L Hertford : Hertfordshire Archaeological Trust, 2002, 20pp, figs, tabs, refs

Work undertaken by: Hertfordshire Archaeological Trust

The area of proposed development was thought to be linked with Roman pottery and tile production, as well as occupation from the 11th century. Little ground disturbance at the site may have been helpful in characterising the nature of this industry. [Au(adp)]

BALDOCK ROAD, ROYSTON*Proposed relocation of Royston Football Club, Royston, Hertfordshire. An Archaeological Desk-Based Assessment*

Ralph, S Hertford : Hertfordshire Archaeological Trust, 2002, 29pp, figs, tabs, refs

Work undertaken by: Hertfordshire Archaeological Trust

Eastern Region

The assessment was concerned with the relocation of Royston Football Club's ground. The proposed site, though not directly interfering with archaeological remains, was in an area of archaeological importance, with upstanding prehistoric funerary monuments, including the only long barrow in Hertfordshire. Crop marks and flint scatters also surrounded the site. [Au(adp)]

Work undertaken by: Hertfordshire Archaeological Trust

In advance of the construction of new dwellings, as well as the refurbishment of a Listed Building, an archaeological desk-based assessment was conducted. The historic High Street preserved the line of the Roman Road, and was also located in an area of known medieval development from the 13th century onwards. The Listed Building may have been considerably older than the list description had recognised. Two other Listed Buildings, at nos 138 and 140, were demolished despite their Listed status in 1984. Prosser, L Twickenham : AOC Archaeology Group, 2002, 35pp, figs, refs

Work undertaken by: AOC Archaeology Group

A review of documentary, geological, archival and cartographic sources has indicated that the site lies in an area know to have moderate archaeological potential. The geotechnical report though reveals a substantial depth of modern made ground across the site. The proposed development plan appears to avoid any intrusive works and should avoid damaging any archaeological deposits. No further archaeological investigation need be taken. [Au(abr)]
