LAND BETWEEN COLLEY STREET AND ARCHER LANE

Land Between Colley Street and Archer Lane, Boston

Albone, J Sleaford : Archaeological Project Services, 2002, 33pp, colour pls, figs, tabs

Work undertaken by: Archaeological Project Services

An archaeological assessment was carried out on the proposed development site. The assessment identified that although the site has no known archaeology, medieval archaeology has been identified in the vicinity and the site was located within the bounds of the medieval town. Further work was recommended. [Au(abr)] *SMR primary record number:* 2844

LOWER WITHAM FLOOD DEFENCE IMPROVEMENT SCHEME (PHASE 4 WORKS)

Lower Witham Flood Defence Improvement Scheme (phase 4 works). Part 3: Branston Delph, Nocton Delph, Merrington Delph and 3 Sections of the Car Dyke

East Midlands Region

Rylatt, J Lincoln : Pre-Construct Archaeology, 2002, 158pp, figs, tabs, refs
Work undertaken by: Pre-Construct Archaeology

An archaeological assessment was carried out on the area of the flood defence scheme. Areas of the proposed scheme were identified as having moderate to high potential for Roman remains associated with Car Dyke. Three sections of Car Dyke within the scheme were also identified as Scheduled Ancient Monuments. [Au(abr)]

Allen, M Lincoln : Pre-Construct Archaeology, 2002, 21pp, figs, tabs, refs
Work undertaken by: Pre-Construct Archaeology

An archaeological assessment was carried out on the route of the proposed pipeline. The assessment identified that the groundworks for the pipeline would impact upon archaeology. The pipeline follows part of the route of the Roman Road 'Ermine Street'. The pipeline would also go through the Roman settlement of Ancaster and although the pipeline would follow the route of an earlier pipeline, access pits would impact archaeology. [Au(abr)]

GAINSBOROUGH AND CAENBY CORNER*Archaeological Implications of a Proposed Pipeline Between Gainsborough and Caenby Corner*

Albone, J Sleaford : Archaeological Project Services, 2002, 51pp, colour pls, figs, tabs, refs

Work undertaken by: Archaeological Project Services

An archaeological assessment was carried out on the proposed pipeline route. The assessment identified that at the village of Heapham the pipeline route would pass through an SAM comprising of a medieval moated site. Ridge and furrow was also identified along the route of the pipeline in this area. Isolated Neolithic axes and worked flint were identified as being recovered close to the route and a potential for prehistoric remains was identified for the route. Roman and Saxon occupation was identified close to the route at Springthorpe and Saxon, medieval and later agricultural activity was identified across most of the route. Part of the pipeline was also identified as being located within a medieval deer park. [Au(abr)]

GAINSBOROUGH TO CAENBY CORNER (WESTERN SECTION)*The Archaeological Implications of the Gainsborough to Caenby Cornere Gas Pipeline. (Western Section)*

Albone, J Sleaford : Archaeological Project Services, 2002, 25pp, colour pls, figs, tabs

Work undertaken by: Archaeological Project Services

A supplementary assessment was carried out on the proposed pipeline route. Assessment identified that the western section of the pipeline crossed a medieval deer park and the pipeline would have a potential impact on any associated features. The western end of the pipeline was also identified as falling within the wider battle field area of the 1643 Civil War Battle of Gainsborough. A post-medieval sandpit and 19th century brickworks were also identified along the route. [Au(abr)]

GLEBE FARM, NETTLETON*Glebe Farm, Church Street, Nettleton, Lincolnshire*

Gardner, R Lincoln : Pre-Construct Archaeology, 2002, 13pp, pls, figs, tabs, refs

Work undertaken by: Pre-Construct Archaeology

An archaeological assessment was carried out on the proposed development site. The potential for prehistoric, early medieval, Roman and post-medieval archaeology was identified as being slight. The assessment indicated that earthworks visible on the site were probably from medieval activity and it is highly probable that these remains extend across the site as buried features. [Au(abr)] *SMR primary record number:* 2924
