*Work undertaken by:* AOC Archaeology Group

A review of documentary, geological, archival and cartographic sources has indicated that the site lies in an area know to have very limited archaeological potential. Due to large-scale earth extraction in the late 1930s and the subsequent use as a landfill site, it is highly likely that any archaeological deposits would have been removed. No further archaeological investigation need be undertaken. [Au(abr)]

**HAVERING HOSPITAL, OLDCHURCH PARK, ROMFORD***Havering Hopsital, Oldchurch Park, Romford, London Borough of Havering, An Archaeological Assessment*

Hemley, S Twickenham : AOC Archaeology Group, 2002, 34pp, figs, tabs, refs

*Work undertaken by:* AOC Archaeology Group

The site lies within an area of high archaeological potential as identified by the Greater London Archaeology Advisory Service. There are entries from the Greater London Sites and Monuments Record located within the boundaries of the subject site and numerous entries from within a 500 metre 'radius'. However, the British Geological Survey map of North London shows that the site was subject to mineral extraction in the past, and subsequently backfilled. Geotechnical investigations confirm this. Therefore, it was thought no further archaeological investigation is necessary [Au(abr)]
