20 CHURCH STREET, OLD ISLEWORTH***20 Church Street, Old Isleworth, London***

Boyle, A Oxford : Oxford Archaeology, 2002, 24pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

It was thought that alluvial deposits from the late prehistoric may have been present within the development area. However, made ground and insignificant post-medieval demolition debris was thought to cover the site to a depth greater than the pilings of the proposed development, so any archaeological remains should have remained safe. Appropriate mitigation was recommended. [Au(abr)]

403 HIGH STREET, BRENTFORD***403 High Street, Brentford, London Borough of Hounslow. An Archaeological Desk-Based Assessment***

Ford, S Reading : Thames Valley Archaeological Services, 2002, 17pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

The location of the site near the Thames and the London to Staines Roman Road suggested an area of high archaeological potential. Several prehistoric findspots were located nearby. The survival of archaeological remains would depend on the extent of modern truncation. An evaluation was recommended to assess this. [Au(adp)]

BRUNEL UNIVERSITY, OSTERLEY CAMPUS, HOUNSLOW***Brunel University, Osterley Campus, London Borough of Hounslow. An Archaeological Desk-Based Assessment***

Hardy, L-M Reading : Thames Valley Archaeological Services, 2002, 23pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

The assessment indicated that the site was relatively undisturbed until the construction of the college in the 19th century. There were no records of finds or features of an archaeological nature in the development area itself. Finds in the vicinity were sparse. Both these factors were thought to be due to lack of activity rather than genuine absence. A field evaluation was recommended. [Au(abr)]

SYON LODGE, ISLEWORTH

Syon Lodge, London road, Isleworth, London Bourough of Hounslow

Hemley, S Twickenham : AOC Archaeology Group, 2002, 43pp, figs, refs

Work undertaken by: AOC Archaeology Group

From cartographic and documentary evidence for the area, it can be shown that the site may have been subject to past human activity within the prehistoric, Roman, medieval and post-medieval periods. Syon lodge itself was originally built in the late 18th century and is a listed building. Previous archaeological investigations adjacent to the site have revealed archaeological remains. It may be required that an archaeological evaluation be conducted prior to planning consent to assess the nature and extent of any archaeological remains. [Au(adp)]
