Bluer, D London : Museum of London Archaeology Service, 2002, 34pp, figs, refs

*Work undertaken by:* Museum of London Archaeology Service

The topographical situation of the site means that there is a high potential for prehistoric remains on the site, particularly of the Bronze Age. A timber trackway of that period was found a short way up the Ropding, on the same bank. The report concludes that further investigation (e.g. field evaluation) may be necessary to determine the exact nature and depth of any surviving archaeological deposits.
