The Archaeology Practice Newcastle upon Tyne : The Archaeological Practice, 2002, 28pp, colour pls, pls, figs, refs

Work undertaken by: The Archaeological Practice

It is considered unlikely that extensive development of the site took place prior to the modern period. Given the low potential for the presence of significant archaeological deposits within the proposed development area, recommendations call for the evaluation of the site by excavation. [Au(abr)] *SMR primary record number:* 252

Work undertaken by: University of Durham, Archaeological Services

Although no archaeological remains area known to be present in the areas of proposed future development there is evidence of activity in the immediate vicinity from the prehistoric period. Therefore any future development of the sites is likely to impact upon the archaeological resource. [Au(adp)] *SMR primary record number:* 345

Mabbit, J Newcastle upon Tyne : Tyne & Wear Museums Archaeology Department, 2002, 55pp, colour pls, figs, tabs, refs

Work undertaken by: Tyne & Wear Museums Archaeology Department

There is evidence for prehistoric activity within the wider study area, no evidence of Romano-British period activity and evidence for early medieval activity in the study area confined to place-name evidence. During the post-medieval period, there are some references to colliery activity in the study area. There references may provide clues to the origin of various earthwork features located within the site. [Au(abr)] *SMR primary record number:* 265

Work undertaken by: Tyne & Wear Museums Archaeology Department

The evidence for past activity within the study area, the archaeological remains of which could be directly adversely affect by development. The obvious result of any development at Lane End would be the destruction of a well preserved and visible medieval landscape. The possible prehistoric remains and the possible post-medieval pond/extraction put could also be directly affected. [Au(abr)] *SMR primary record number:* 245

Work undertaken by: The Archaeological Practice

The main finding of the assessment is that the area displays few monuments of features of cultural heritage significance. The potential for the survival of previously unknown monuments, features or deposits of significance within the proposed development area is regarded as low.
