HALF MOON LANE, GATESHEAD***Half Moon Lane, Gateshead***

Wearing, N Lancaster : Oxford Archaeology North, 2002, 47pp, colour pls, pls, figs, refs

Work undertaken by: Oxford Archaeology North

Given that the building on Half Moon Lane have been extensively cellared it is considered that there is no need for an evaluation of this area. However, there is potential for surviving archaeological deposits within the footprint of 18-24 Bottle Bank and the former works building on William IV Yard, and it is recommended that these be subject to trial trenching to investigate the below ground survival of archaeological remains. EC Harris Leeds : EC Harris, 2002, 77pp, colour pls, pls, figs, tabs, refs

Work undertaken by: EC Harris

The results of the desk-top Study show that there is a high potential for archaeological remains on the site, despite development and re-development of the site since the mid 19th century. The site has been occupied at least since the Roman period and possibly from before this date. [Au(abr)] *SMR primary record number:* 2002/40

Stronach, S & Jones, E Edinburgh : Headland Archaeology Ltd, 2002, 63pp, colour pls, figs, tabs, refs

Work undertaken by: Headland Archaeology Ltd

The archaeological remains are significant and have the potential to add to our knowledge of both Roman Britain and an important medieval priory. Any proposed development should adopt an appropriate mitigation strategy; either avoiding damage to the archaeological deposits or excavating and recording them archaeologically. Northern Counties Archaeological Services Chester-le-Street : Northern Counties Archaeological Services, 2002, 34pp, pls, figs, refs

Work undertaken by: Northern Counties Archaeological Services

Despite extensive areas of cellaring and modern basements, some area of apparently undisturbed ground apparently survive within the footprint of the proposed development, and will be destroyed by new basemementing. Although relatively small, surviving archaeology within these areas area likely to be largely 'backland' deposits containing rubbish pits with potential for yielding information on diet and economy for this area of the medieval town. There is also the potential for the survival of similar features and deposits from the 17th and 18th centuries. [Au(abr)]
