***Land North of Quarry Farm, Ingleby Barwick: Archaeological Assessment***

University of Durham, Archaeological Services    Durham : University of Durham, Archaeological Services, 2002, 13pp, pls, figs, refs

*Work undertaken by:* University of Durham, Archaeological Services

Quarrying from the early 19th century would have removed any archaeological evidence from previous periods in a substantial proportion of the area. ridge and furrow survives on the southern edge of the quarry area. This has been recorded as part of a previous evaluation scheme. Evidence for quarrying survives within the area, in the form of the quarry and its soil heaps. No structures are visible. Earthworks relating to a tramway still survive. [Au(abr)]
