CLIFFE BRIDGE, LEWES***Lewes Riverside Study: the Archaeological Evidence***

James, R Ditchling : Archaeology South-East, 2002, 7pp, figs, refs

Work undertaken by: Archaeology South-East

A review of below-ground archaeological significance was undertaken on behalf of Lewes District Council in order to allow informed decisions to be made on the likely impacts to the area from future flood alleviation proposals. Six entries are listed on the SMR within the bounds of the study area: a Franciscan friary, a brewery, Cliffe Bridge, a Neolithic flake axe, medieval and later rubbish pits with a chalk 'surface' and a former cinema. The area has the potential to contain a rich and important archaeological resource. [Au(adp)]

LEWES RIVERSIDE***Lewes Riverside, A Report on the Historical and Archaeological Significance of the Lower High Street and Cliffe High Street Area***

The Conservation Studio Lewes : The Conservation Studio, 2002, 62pp, colour pls, figs, tabs, refs

Work undertaken by: The Conservation Studio

An assessment was carried out in response to severe flooding of the area in 2000. The report identified the archaeological and historical features of the Cliffe High Street area. [Au(adp)]

BETWEEN PETT LEVEL AND RYE HARBOUR***An Archaeological Desk-Based Assessment and Survey of the Coast between Pett Level and Rye Harbour, East Sussex***

Water, H & James, R Ditchling : Archaeology South-East, 2002, 65pp, colour pls, figs, tabs, refs

Work undertaken by: Archaeology South-East

A desk-based assessment was compiled for a 5-mile stretch of coastline between Cliff End and Rye Harbour. The survey concluded that the proposed works might affect deposits and structures of archaeological importance. A peat bed of prehistoric date, a medieval salt-working, an 18th-century harbour, 19th-century sea defences, WWII pillboxes, two aircraft crash sites and a historic wreck were noted. The timber and stone remains of Smeaton's Harbour were briefly surveyed. Any conclusions can only be tested by fieldwork techniques. [Au(abr)]
