**LAND AT BICESTER*****Land at Bicester, Oxfordshire***

Stoten, G Cirencester : Cotswold Archaeological Trust, 2002, 18pp, figs, tabs, refs

*Work undertaken by:* Cotswold Archaeological Trust

Crop marks around the study area may have indicated activity at this site. However, it was thought that the extension of Bicester airbase was likely to have affected the archaeological record in the north-west of the study area. The rest of the site was thought to be unaffected. [Au(adp)]

**LAND OFF MIDDLETON, STONEY ROAD, BICESTER*****Land off Middleton, Stoney Road, Bicester, Oxfordshire. Desk-Top Assessment***

Bashford, D Oxford : Oxford Archaeology, 2002, 20pp, figs, tabs, refs

*Work undertaken by:* Oxford Archaeology

The study confirmed that there was a high potential for the discovery of Iron Age and Roman archaeology. Alluvial deposits were thought to seal archaeological remains, and the historic marshy nature of the area would have generated high levels of preservation. The land was not thought to have been used for anything other than rough pasture in later periods. [Au(adp)]

**PARK END STREET, OXFORD*****Park End Street Development Block, Oxford. Desk-Top Assessment***

Hind, J Oxford : Oxford Archaeology, 2002, 20pp, figs, tabs, refs

*Work undertaken by:* Oxford Archaeology

The assessment revealed that a number of archaeological investigations had been conducted in the vicinity, and suggested that the potential of the discovery of archaeological remains was generally low. However, the Civil War defences were known to be in the area and the potential for their discovery was high. The low level of previous development would have aided in the preservation of archaeological remains. [Au(adp)]

**REDGRAVE AND PINSENT ROWING LAKE, CAVERSHAM*****Redgrave and Pinsent Rowing Lake, Caversham Lakes, Henley Road, Caversham, Oxfordshire. An Archaeological Desk-Based Assessment***

Hardy, L-M Reading : Thames Valley Archaeological Services, 2002, 22pp, figs, tabs, refs

*Work undertaken by:* Thames Valley Archaeological Services

*South East Region*

The site was thought to have a rich archaeological background, due to its proximity to the Thames. Many entries for finds in the vicinity were seen on the SMR. Due to the relatively undeveloped nature of the area, the site was thought to be of a high archaeological potential. [Au(abr)]

**SHOTOVER MOUND, SPRING LANE, HEADINGTON QUARRY, OXFORD***Shotover Mound, Spring Lane, Headington Quarry, Oxford. An Archaeological Desk-Based Assessment*

Hardy, L-M Reading : Thames Valley Archaeological Services, 2002, 23pp, figs, tabs, refs

*Work undertaken by:* Thames Valley Archaeological Services

Archaeological records indicated that the site lay in an area of archaeological potential, particularly with respect to the line of the nearby Roman Road. Archaeological investigations have revealed evidence for roadside settlement, as well as prehistoric sites and finds, including a destroyed round barrow. Further archaeological work was recommended. **WATKINS FARM, NORTHMOOR***Watkins Farm, Northmoor, Oxfordshire. Environmental Impact Assessment*

Hey, J Oxford : Oxford Archaeology, 2002, 8pp, figs, tabs, refs

*Work undertaken by:* Oxford Archaeology

The site was thought to have a low potential for the discovery of archaeological remains before the Iron Age period. Late prehistoric and Roman features in the form of a trackway and field system were known to exist, although their condition was uncertain. Medieval ridge and furrow was thought to survive on parts of the site. [Au(adp)]
