LAND AT MARKET LANE

Archaeological Desk-Based Assessment. Land at Market Lane, Slough

Bourn, R London : CgMs, 2002, 22pp, figs, tabs, refs

Work undertaken by: CgMs

The assessment concluded that the site lay in an area of generalised potential for Palaeolithic and prehistoric remains. Significant Palaeolithic assemblages have been recorded close to the site, usually from a considerable depth. Such deposits would not be impacted by development. A Neolithic settlement and funerary monument has been identified nearby, as well as a possible Iron Age field system. If such remains were found on site, they would be greatly affected by the proposed development. An archaeological evaluation was recommended. [Au(abr)]
