CHURCH FARM, SHINFIELD

A Desk-Top Assessment and Report on an Archaeological Field Evaluation at Church Farm, Shinfield, Berkshire

Berkshire Archaeological Services Aldermaston : Berkshire Archaeological Services, 2002, 40pp, figs, tabs, refs

Work undertaken by: Berkshire Archaeological Services

The desk-based assessment identified the site's area as a focus for activity from prehistory to the present day. Flint and pottery scatters indicated sparse activity until the 11th century, when Shinfield was known to have been a settlement. Evidence suggests a focus for this in the church area. There was thought to be a possibility that medieval remains associated with a moated site might be found in the western part of the study area. [Au(abr)]

LAND AT MARSH FARM, LOWER EARLEY

Land at Marsh Farm, Lower Earley, Berkshire. An Archaeological Desk-Based Assessment

Hardy, L-M Reading : Thames Valley Archaeological Services, 2002, 41pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

There were no known monuments or findspots on the site. However the size of the site, coupled with the richness of the archaeological landscape surrounding it, indicated that there was high potential for the recovery of archaeological remains. These were expected to be heavily truncated due to the use of the site as a sewage works. [Au(adp)]

METHODIST CHURCH, ROSE STREET, WOKINGHAM

Methodist Church, Rose Street, Wokingham, Berkshire. An Archaeological Desk-Based Assessment

Ford, S Reading : Thames Valley Archaeological Services, 2002, 23pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

South East Region

The assessment established that the site lay within the historic medieval core of the town, and was fronted on one of the medieval streets. Many medieval and post-medieval features were apparent in the immediate vicinity. There was nothing to indicate that the site had been severely truncated by development, and as a result it was considered that the area was of high archaeological potential. However, it was not thought that any archaeological remains would merit in situ preservation as a planning requirement. A watching brief was recommended as appropriate mitigation. [Au(abr)]

MUMBERY LODGE, SCHOOL HILL, WARGRAVE

Mumbery Lodge, School Hill, Wargrave, Berkshire. An Archaeological Desk-Based Assessment

Ford, S Reading : Thames Valley Archaeological Services, 2002, 19pp, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

The study revealed that the site lay beyond the medieval core of Wargrave, however it was in an area potentially rich in archaeological remains. No finds had been located in the immediate area of the site, and investigations in the immediate area found little of significance. It was decided that the site had a low archaeological potential. ST MARY'S CHURCH, WARGRAVE

A Desk-Top Assessment, Geophysical Survey and Field Evaluation at St Mary's Church, Wargrave, Berkshire

Berkshire Archaeological Services Aldermaston : Berkshire Archaeological Services, 2002, 54pp, figs, tabs, refs

Work undertaken by: Berkshire Archaeological Services

The assessment revealed that the church had its origins in the 12th century. The development concerned the construction of a new church hall and as part of the works a geophysical survey and evaluation were required to be carried out. [Au(abr)]
