**GUNFLEET SANDS OFFSHORE WIND FARM*****Gunfleet Sands Offshore Wind Farm. Environmental Assessment: Archaeology***

Dunkley, M &amp; Webster, S Salisbury : Wessex Archaeology, 2002, 58pp, colour pls, figs, tabs, refs

*Work undertaken by:* Wessex Archaeology

This desk-based assessment was prepared in advance of the development of an offshore wind farm, which was likely to damage any archaeology in the vicinity. As well as documented sources, it was anticipated that other wreck sites dating to as early as the Iron Age or before may have been affected. Geophysical anomalies were thought to represent previously unidentified archaeological remains. Potentially, remains from as early as the Mesolithic could be affected. [Au(adp)]

**LAND ADJACENT TO PARSONS POOL HOUSE, SHAFTESBURY*****Land adjacent to Parsons Pool House, Shaftesbury, Dorset***

Place, C Shaftesbury : Place Archaeological Consultants, 2002, 22pp, figs, tabs, refs

*Work undertaken by:* Place Archaeological Consultants

The site lay in an area that has been developed from at least the late 13th century. There was no substantial modern development, and therefore any archaeological remains would have escaped impacts generated by cellar development. The site's location in an area of high archaeological potential may have meant that archaeological remains might have been present. [Au(adp)]

**WORGRET MANOR FARM, WAREHAM*****The Proposed Developmnet of Land at Worgret Manor Farm, Wareham***

Adam, N, Chandler, J & Cox, P Hindon : AC archaeology, 2002, 43pp, figs, tabs, refs

*Work undertaken by:* AC archaeology

The assessment established that the area contained no Scheduled Ancient Monuments or Listed Buildings, although a number surrounded the study area. Some archaeological potential was identified with a Late Iron Age/Roman industrial site at the eastern edge of the proposed development area. Lower potential for the medieval settlement at Worgret manor was expected. A number of historically important hedgerows were noted in the area. The study attempted to zone areas of archaeological potential within the application area. [Au(adp)]

**LAND ADJOINING WOODLANDS ESTATE, SANDFORD*****Land Adjoining Woodlands Estate, Sandford, Near Wareham, Dorset***

Seager-Smith, R Salisbury : Wessex Archaeology, 2002, 22pp, colour pls, figs, tabs, refs

*Work undertaken by:* Wessex Archaeology

The assessment was carried out as part of a promotion of the area. The potential for the survival of archaeological remains associated with the Roman Road and medieval droveway was considered to be low to moderate, while the potential for other periods was unknown. The alluvial landscape was deemed to have been conducive to early settlement, especially from the prehistoric period. [Au(adp)]

Hunter, J London : CgMs, 2002, 16pp, figs, refs

*Work undertaken by:* CgMs

This site lay in close proximity to much Roman archaeology, including a sarcophagus 10 metres to the north east of the site boundary. This high potential for the discovery of archaeological features, especially human remains, led to the recommendation that a watching brief be carried out on any groundworks. [Au(adp)]
