AVEBURY SOUTHERN CAR PARK [GLEBE FIELD]*Avebury Southern Car Park (Glebe Field). A Desk-Based Assessment*

Last, J Portsmouth : English Heritage, 2002, 22pp, figs, tabs, refs

Work undertaken by: English Heritage

A mitigation strategy for the development of a new toilet block in the overflow car park was discussed, after the assessment was carried out. Various strategies to minimize the impact on an archaeologically sensitive area were put forward. [Au(adp)]

LAND AT SAVERNAKE HOSPITAL*Archaeological Desk-Top Study of Land at Savernake Hospital, Wiltshire*

Bristol and Region Archaeological Services Bristol : Bristol and Region Archaeological Services, 2002, 33pp, colour pls, figs, tabs, refs

Work undertaken by: Bristol and Region Archaeological Services

The study area appeared to have been used solely for agricultural purposes at the time it was developed in the 19th century and probably many years previously. It was located in a prehistoric and Roman landscape setting, with two Scheduled Ancient Monuments in the immediate vicinity. It was possible that important archaeological remains were present within the study area itself. [Au(adp)]

LE MARCHANT BARRACKS, LONDON ROAD, DEVIZES*Le Marchant Barracks, London Road, Devizes*

Hardy, L-M Reading : Thames Valley Archaeological Services, 2002, 24pp, colour pls, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

There were no records of archaeological finds in the study area itself. However, this was thought to be due to a lack of previous investigation than a genuine absence. A field evaluation was recommended to fully ascertain the archaeological potential of the site. [Au(abr)]

WANBOROUGH TO ALDBOURNE GAS PIPELINE*Wanborough to Aldbourne Gas Pipeline. Archaeological Desk-Based Assessment*

Cotswold Archaeological Trust Cirencester : Cotswold Archaeological Trust, 2002, 45pp, colour pls, figs, tabs, refs

Work undertaken by: Cotswold Archaeological Trust

South West Region

Potential for the discovery of archaeological remains was high. A large number of Neolithic finds have been found in the area, as well as a Bronze Age bowl barrow and associated finds. A number of undated ring-ditches have also been recorded through aerial photography. There were also late prehistoric/early Roman field systems in the area, as well as a Roman Road, surfaces and settlements. The potential of survival of known and unknown remains was judged to be good. [Au(adp)]

CALNE TO COMPTON BASSETT GAS PIPELINE***Calne to Compton Bassett Pipeline. Archaeological Desk-Based Assessment***

Stoten, G Cirencester : Cotswold Archaeological Trust, 2002, 23pp, colour pls, figs, refs

Work undertaken by: Cotswold Archaeological Trust

Crop marks in the vicinity of the site were thought to be indicative of prehistoric activity in the area. Ridge and furrow earthworks were noted from aerial photographs and may have been more prevalent before ploughing. There was, in general, thought to be medium potential for the recovery of archaeological material. [Au(adp)]

A303 WYLYE TO STOCKTON WOOD IMPROVEMENT***A303 Wyle to Stockton Wood Improvement, Wiltshire***

Davis, B & Manning, A Salisbury : Wessex Archaeology, 2002, 24pp, figs, tabs, refs

Work undertaken by: Wessex Archaeology

Proposals for the improvement of the A303 in this area led to a thorough appraisal of the known archaeology. The study area was shown to contain a large number of archaeological features, including two Scheduled Ancient Monuments [Stockton Earthworks and Grim's Ditch] and a Listed Building. A Roman Road ran through the area and a number of field systems and enclosures were present. The potential for the survival of early archaeological evidence was considered very high, with the possible discovery of remains of national importance. [Au(abr)]

A303 CHICKLADE BOTTOM TO MERE IMPROVEMENT***A303 Chicklade Bottom to Mere Improvement***

Davis, B & Manning, A Salisbury : Wessex Archaeology, 2002, 28pp, figs, tabs, refs

Work undertaken by: Wessex Archaeology

A large number of archaeologically significant features were present in the area, from the prehistoric to post-medieval periods. Six SAMs and 11 Listed Buildings were recorded in the area. The major impact of the proposed road scheme was deemed likely to fall on extensive prehistoric field systems. Although

South West Region

no information was available as to the depth of the impact, it was thought that it would affect any below-ground archaeological remains, possibly of national importance. [Au(adp)]

SOUTH WRAXHALL MANOR

South Wraxall Manor, South Wraxall. Archaeological Assessment

Heaton, M Warminster : ASI Heritage Consultants, 2002, 41pp, colour pls, figs, refs

Work undertaken by: ASI Heritage Consultants

The site was revealed to be an architectural palimpsest spanning the 15th-20th centuries. The assessment confirms antiquarian analyses of the site, as well as explaining some ambiguities in the fabric of the building. Refurbishment proposals would not, in the main, have a deleterious impact, as most of the affected areas were of 19th-20th century origin. Mitigation strategies were proposed where individual elements of greater historical value would be impacted. [Au(adp)]
