**BEDFORD SHIRE HALL**  
*Bedford Shire Hall and Surrounding Site*  
Edgeworth, M Bed ford : Albion Archaeology, 2005, 48pp, figs, tabs, refs

*Work undertaken by:* Albion Archaeology

A desk-based assessment was undertaken on the proposed development site. The assessment identified that the site lay within the historic core of Bedford close to St. Paul’s church and the river, and that the site had potential for Saxon and medieval archaeology relating to waterfront activity. [Au(abr)]

Archaeological periods represented: MD

**LAND OFF NORSE ROAD, BEDFORD**  
*A Desk-based Assessment at Land off Norse Road, Bedford*  
Browning, J Leicester : University of Leicester Archaeological Services, 2005, 16pp, figs, tabs, refs

*Work undertaken by:* University of Leicester Archaeological Services

An assessment was carried out in advance of a residential development. The potential for medieval remains was considered low, as the site lay on a parish boundary, however, for earlier periods, the potential for encountering remains was unknown. Further investigation was recommended. [Au(abr)]

Archaeological periods represented: MD

**Luton**

**ST. GEORGE'S SQUARE RENAISSANCE, LUTON**  
*St. George's Square Renaissance, Luton, Bedfordshire. An Archaeological Desk-Based Assessment*  
Halpin, C Hertford : Archaeological Solutions, 2005, 76pp, pls, figs, tabs, refs

*Work undertaken by:* Archaeological Solutions

The study area was thought likely to be prolific in archaeology of the medieval period onwards. The frontage to Bridge Street and Manchester Street were thought to have a high potential for remains to be discovered, although truncation by cellaring was foreseen. Any remains would have been significant to the settlement of Luton, consolidating the gap in the archaeological record created by the development of the city centre. [Au(adv)]

**DISC CHICKSANDS**  
*DISC Chicksands, Bedfordshire. Archaeological Desk Based Assessment. Defence Training Review*  
Wessex Archaeology Salisbury : Wessex Archaeology, 2005, 59pp, colour pls, figs, tabs, refs

*Work undertaken by:* Wessex Archaeology
A desk-based assessment was carried out on MOD freehold land at the Defence and Intelligence Security Centre. The results established that archaeological sites and findspots ranging in date from the Neolithic period to the second half of the 20th century had been defined within the site itself and also within the wider Study Area. These indicated the potential for the presence of previously unidentified archaeological remains and deposits with the site. An appraisal had been made of the likelihood of remains of different periods surviving within the site, as well as highlighting known archaeological sites and findspots. [Au(abr)]

BREWERS HILL ROAD, DUNSTABLE

Brewers Hill Road, Dunstable
Roe, A Leeds : Scott Wilson, 2005, 44pp, figs, tabs, refs
Work undertaken by: Scott Wilson
A desk-based assessment was undertaken on the proposed redevelopment area. The assessment identified lay close to areas of known prehistoric activity and on the line of the Roman road, Watling Street. The site was built-up in the late post-medieval period and would have been affected by the construction of the road and railway through the site. No further work was recommended. [Au(abr)]

*Proposed Eastern Extension, Rickneys Quarry, Near Ware, Hertfordshire. An Archaeological Desk-based Assessment*  
Preston, S  
Reading: Thames Valley Archaeological Services, 2005, 21pp, figs, refs  
*Work undertaken by:* Thames Valley Archaeological Services  
The site lay in an area of considerable archaeological potential. No previous work had covered the site area in detail, but neighbouring areas revealed extensive prehistoric remains. Aerial photographs showed no sign of major crop marks on the site. The site had been undeveloped throughout its later history and therefore any remains present were likely to have been well preserved. Extraction would inevitably destroy any remains that may have been present within the site.

Appleby, G & Dickens, A Cambridge : Cambridge Archaeological Unit, 2005, 43pp, colour pls, figs, tabs, refs
Work undertaken by: Cambridge Archaeological Unit
A desk-based assessment was undertaken on the proposed development site. The assessment identified that site lay in an area known to have been occupied since the early medieval period. Much of the site was truncated by 19th/20th century quarrying activity and any archaeology would be limited to the small undisturbed areas. [Au(adp)]

RPS Consultants Abingdon : RPS Consultants, 2005, 42pp, figs, tabs, refs
Work undertaken by: RPS Consultants
A desk-based assessment was undertaken on the proposed development sites at Warners Bridge and Tickfield Avenue. The assessment identified a high presence of prehistoric and Roman archaeology close to the Warner Bridge site and identified the site as having moderate for archaeology. The Tickfield site was identified as being a former quarry site and unlikely to have archaeology. [Au(abr)]

*Work undertaken by:* CgMs

A desk-based assessment was undertaken on the proposed redevelopment and alterations to the Grade II Listed building. The assessment identified that the site was located within the Roman settlement/industrial activity area and therefore had high potential for Roman archaeology. A mitigation strategy was recommended. [Au(adp)]

*Work undertaken by:* Archaeological Solutions

A desk-based assessment was undertaken on the proposed development site. The assessment identified that the site was located within an area where Middle Palaeolithic material has been recovered. The assessment also identified that although the site was outside the medieval town defences, features associated with the defences had the potential to have been located in the northern portion of the site. *Work undertaken by:* Archaeological Solutions
The assessment site lay in an area where Palaeolithic flint implements had been discovered. 11th century defences of the town were also thought to survive in the area. There was thought to be a good potential for the discovery of waterlogged deposits at the site. The area was used as open pasture in the medieval period. [Au(adp)]
