THE FORMER NATIONAL TEMPERANCE HOSPITAL, 110-122 HAMPSTEAD ROAD, LONDON BOROUGH OF CAMDEN

The Site of the Former National Temperance Hospital, 110-122 Hampstead Road, London Borough of Camden. An Archaeological Desk-based Assessment

Sygrave, J Ditchling : Archaeology South-East, 2006, 39pp, figs, tabs, refs

Work undertaken by: Archaeology South-East

An archaeological desk-based assessment of the site of the Former National Temperance Hospital was carried out. Prior to the post-medieval period the site appeared to have been situated in farmland to the north of the Totten Hall Manor and was described as pasture land in a survey of the manor in 1694. In 1789 the land was leased to St. James', Piccadilly for 99 years for use as that church's third burial ground, and a chapel and vicarage erected. The present site occupies the front of the land leased to St. James', on which the church buildings were constructed, and a small portion of the known cemetery. The Metropolitan Burials Act of 1853 resulted in the closure of the cemetery and by 1871 the chapel had been sold to the parish of St. Pancras and by 1887 the cemetery turned into a public garden, St. James Park. In 1875 the land surrounding the church was sold to enable the construction of the National Temperance Hospital. The majority of the hospital buildings on site were single basemented. The Hospital went through several phases of construction and suffered heavy bomb damage during World War II. However, the hospital buildings were repaired by 1947 and continued in use until recent years as part of the NHS. St. James' church was demolished in the early 1960s. It was known that the chapel/church had a crypt but it had not been possible to learn if this was emptied prior to the demolition of the church. [Au(abr)]

120 MOORGATE

120 Moorgate. Archaeological Desk-based Assessment

Antony, S London : Museum of London Archaeology Service, 2006, 32pp, figs, tabs, refs

Work undertaken by: Museum of London Archaeology Service

The proposed development works involved the demolition of the existing building and rebuilding from the basement slab upwards. There was no proposal to excavate further. There was a low possibility that boreholes may have been undertaken in the lower basement area. In light of past ground disturbance, monitoring of any proposed boreholes within the lower basement was not considered necessary. [Au(abr)]

118 Putney Bridge Road, London SW15. Archaeological Desk-based Assessment

Chadwick, P London : CgMs, 2006, 34pp, colour pls, figs, refs

Work undertaken by: CgMs

In view of the site's low archaeological potential and the impact of past development, the current proposed redevelopment was highly unlikely to have an archaeological impact. It was therefore concluded that there will be no archaeological requirement for any further archaeological mitigation measures. [Au(abr)]

LAND AT PUTNEY HOSPITAL, LOWER RICHMOND ROAD, PUTNEY

Archaeological Desk Based Assessment. Land at Putney Hospital, Lower Richmond Road, Putney, London SW15

Hawkins, D London : CgMs, 2006, 32pp, pls, figs, refs

Work undertaken by: CgMs

Prior to c.1800, the study site formed part of the Putney Lower Common. The site was first developed between 1800 and 1845 with two large villas. From 1910 onward, the site was developed as the former Putney Hospital. On the basis of the available evidence, it was suggested that the archaeological impact of the proposed development be mitigated by the implementation of an archaeological monitoring exercise. [Au(adp)]

An Archaeological Desktop Assessment of The Lancasters, 75-89 Lancaster Gate, City of Westminster, London W2

Boyer, P London : Pre-Construct Archaeology Ltd, 2006, 39pp, figs, tabs, refs

Work undertaken by: Pre-Construct Archaeology Ltd.

The proposed construction of a three storey basement car park would substantially impact on any buried archaeological remains in the garden area. There was a negligible potential for palaeoenvironmental remains, a low potential for earlier prehistoric remains, a moderate potential for later prehistoric remains, a high potential for Roman remains, a low potential for early medieval and medieval remains and a low to moderate potential for uncovering post-medieval remains. [Au(abr)]
