

Sub-model 5. Echinoderms and Sessile Epifauna

1. Regional to Global Drivers

2. Water Column Processes

3. Local Processes/Inputs at the Seabed

4. Habitat and Biological Assemblage

5. Output Processes

6. Local Ecosystem Functions

7. Regional to Global Ecosystem Functions

Legend

Magnitude of Influence

- Small
- Medium
- Large
- Driving Influence
- Positive Interaction
- Negative Interaction
- Feedback

Driver Relevance to Infralittoral/Circalittoral

- | | |
|----------------|---------------|
| Low Relevance | Infralittoral |
| High Relevance | Infralittoral |
| Low Relevance | Circalittoral |
| High Relevance | Circalittoral |

Degree of Natural Variability

- Low natural variability
- Moderate natural variability
- High natural variability

Version 1.0
