

Patient reported importance of assistive devices in hip and knee replacement Enhanced Recovery after Surgery (ERAS) pathways

Table 1: Frequency of patients who were given equipment and responded to discharge call

	No of patients equipment given to and given discharge telephone call	No of patients who responded to discharge telephone call	% of patients who responded to discharge telephone call
Total hip replacement - posterior	61	33	54
Total hip replacement - anterior	53	29	55
Total knee replacement	83	52	63
Total	197	114	58
