STONEHENGE WORLD HERITAGE SITE:
AN ARCHAEOLOGICAL RESEARCH FRAMEWORK
STONEHENGE WORLD HERITAGE SITE:
AN ARCHAEOLOGICAL RESEARCH FRAMEWORK

Compiled and edited by Timothy Darvill
with assistance from Vanessa Constant and Ehren Milner

and contributions from Barbara Bender, Ben Chan, John Chandler, Simon Crutchley,
Andrew David, David Field, Mike Parker Pearson, Clive Ruggles and Ann Woodward

London and Bournemouth
English Heritage and Bournemouth University
2005
The researching, compiling, and production of this report was commissioned and funded by English Heritage. It was prepared by a research team based in the Archaeology and Historic Environment Group within the School of Conservation Sciences at Bournemouth University. It incorporates the ideas of numerous contributors who attended the meetings and seminars as well as the work of named authors who provided specific sections for the main text; all are thanked for their contributions and comments.

The cover illustrations show images of Stonehenge and its landscape by Phil Rowley, September 2003.
FOREWORD

From Sir Neil Cossons
Chairman of English Heritage

The best-known monuments are not necessarily the best understood. Our concern to care for them can sometimes inhibit imaginative research. So it is with particular pleasure that I welcome Stonehenge World Heritage Site: An Archaeological Research Framework to kick-start a new era of responsible management combined with important, query-driven investigation.

This publication complements the Archaeology Research Agenda for the Avebury World Heritage Site – published in 2001, the first of its kind for any World Heritage Site – and the regional and period-based research frameworks which English Heritage is currently helping to promote across the country. The production of the Stonehenge Research Framework, co-ordinated by English Heritage and Bournemouth University, has brought together a wide range of people with different interests in Stonehenge and its landscape to debate and argue about what we think we know, and would like to know, about this world-famous and often contentious monument. What are the questions we should ask about Stonehenge and how might we prioritise and tackle them? What information might still be locked within the archives of previous investigations, the collections of museums and the landscape itself? How shall we pursue these questions while caring properly for the World Heritage Site and passing it on to future generations in a better state than it was passed on to us? For we cannot be proud of Stonehenge's treatment in recent decades: ploughed and scoured, pincered between busy roads; it deserves better.

This document is not meant to strait-jacket research, which should be dynamic and responsive. On the contrary, I hope that it will further stimulate interest and proposals. Success will be measured in future years by the extent to which the questions posed here have been addressed, our understanding has improved, and people are able to enjoy Stonehenge both as an outstanding monument and as a place that not only puzzles and intrigues but constantly generates ideas and diverse opinions.

Neil Cossons
CONTENTS

Foreword from Sir Neil Cossons v
Preface and acknowledgements ix
List of illustrations and maps xi
List of tables xiv
Abbreviations and acronyms xiv

SECTION 1 – INTRODUCTION

Background, need, and purpose 2
Towards an Archaeological Research Framework 3
What is a Research Framework? 4
Constructing the Stonehenge World Heritage Site Archaeological Research Framework 5
Definitions, scope, and geographical context 5
History of research 7
Finding the archaeology of the Stonehenge Landscape 14
Interpreting the archaeology of the Stonehenge Landscape 24
Threats, preservation, and survival 30
Designations, management context, and land-use 31
Reflexivity and revision 32

SECTION 2 – RESOURCE ASSESSMENT

Scoping the resource 34
A downland landscape 35
Pleistocene environments and their occupants (to 12,000 BC) 37
Post-glacial hunter-gatherers (12,000–4000 BC) 38
Early and middle Neolithic (4000–3000 BC) 40
Late Neolithic and metal-using Neolithic (3000–2000 BC) 46
Early Bronze Age (2000–1500 BC) 61
Middle and later Bronze Age (1500–700 BC) 66
Iron Age (700 BC– AD 50) 71
Romano-British (AD 50–450) 75
Saxon and early medieval (AD 450–1100) 77
Later medieval (AD 1100–1500) 81
Post-medieval (AD 1500–1800) 86
Nineteenth century AD 91
Twentieth century AD 92
Diachronic themes 96
Stonehenge in its region 102
Stonehenge worlds 103
SECTION 3 – RESEARCH AGENDA

Developing an agenda: defining issues 108
Period-based and site-based issues 109
Subject-based issues 112
Contextual and interpretative issues 115
Management-based issues 118

SECTION 4 – RESEARCH STRATEGY

Creating objectives 122
Ethics and practice 124
Current initiatives 124
Strategy, objectives, and projects 126
The BIG Questions 126
Stonehenge and related monuments 127
Landscape and regional objectives 129
Integrating monuments with the landscape 130
Research infrastructure 132

APPENDICIES

Appendix I – Select investigations in the Stonehenge Landscape 138
Appendix II – Select bibliography of Stonehenge and its landscape 145
Appendix III – Radiocarbon dates 153
Appendix IV – Research Framework consultation process 157

REFERENCES CITED IN THE TEXT 160

INDEX 176

MAPS
In preparing this Research Framework a number of conventions have been adopted. The chronology used is a backward projection of the modern Gregorian calendar expressed in years BC and AD. Dates BC are mainly based on calibrated radiocarbon ages. Where specific dates are cited they are expressed as a date-range calibrated from the original age determination at two standard deviations ($\sigma$) which broadly equates with the 95% confidence limits; the laboratory number and original uncalibrated age determination in years BP (Before Present) are also given. All radiocarbon age determinations have been calibrated using OxCal version 3.5.

Parish names are those prevailing at the time of researching the material and writing the initial document (2001). Where no explicit source reference is given for a site or finds the information has been derived from the English Heritage Stonehenge World Heritage Site GIS model, which itself incorporates information from the Wiltshire County Council Sites and Monuments Record.

The term ‘Stonehenge Landscape’ is used as a proper noun to refer to an explicitly defined block of land centred on Stonehenge, defined further in Section 1. References to the landscape in general are denoted by use of the common noun.

Some of the references cited relate to what is often called ‘grey literature’, that is printed reports and studies with a limited circulation that are not published in the traditional sense. Sometimes these are hard to track down, but the Society of Antiquaries of London has made a special effort to acquire copies of such reports and papers for their library. Any bona fide researcher without access to the Society's library wishing to consult these papers may contact the Librarian seeking permission to see them. The Archaeological Investigations Project records ongoing archaeological excavations and interventions, providing an annually up-dated on-line listing available at: [http://csweb.bournemouth.ac.uk/aip.htm](http://csweb.bournemouth.ac.uk/aip.htm)

We would like to thank all those individuals and organizations listed in Appendix IV, and/or named in the text, for their contributions to the development of this Research Framework. In addition, we especially wish to thank the following for their encouragement, support, assistance in sorting out queries and questions, or providing information as the project unfolded: Pam Barton, David Batchelor, Laura Butler, Roy Canham, Jeff Chartrand, Andrew Crookston, Simon Crutchley, Andrew David, Sue Davies, Marianne Eve, Andrew Fitzpatrick, Lesley Freeke, Vince Gaffney, Tom Gaskar, Sarah Green, Lorna Haycock, Martyn Henderson, David Hinton, Jim Keyte, Andrew Lawson, David Miles, Robert Moody, Patricia Moore, Richard Osgood, Louise Pearson, Mike Pitts, Melanie Pomeroy-Kellinger, Paul Robinson, Bronwen Russell, Miles Russell, Chris Scull, Neville Stokes, Yvette Staelens, Dorothy Treasure, Geoff Wainwright, Gerry Waite, Katy Whitaker, Tim Williams and Martin Wright.

This volume was designed by Grant Campbell and Philip Silk; original photographs for the cover and section dividers are by Philip Rowley; Frances Brown copy-edited the manuscript and assisted with proofreading; Susan Vaughan prepared the index; and James Samson co-ordinated the production and printing.

The maps bound into this volume are derived from data held in the Stonehenge GIS maintained at English Heritage's Centre for Field Archaeology in Portsmouth, with additions. All the maps, together with the line drawings and plans in the text, were produced by Vanessa Constant from source material acknowledged in the relevant captions. Neville Stokes kindly assisted with digitizing the colour photographs. Grateful thanks are extended to the following institutions and individuals for generously allowing the use of pictures and photographs singly or as part of composite illustrations: Birmingham University Institute of Archaeology and Antiquity (100); Bodleian Library, Oxford (65); Jane Brayne (33); Timothy Darvill (9, 18, 19, 26A, 26B, 39A, 68, 71, 74, 76, 82, 84, 88, 89, 92, 95, and 96); Devizes Museum/Wiltshire Archaeological and Natural History Society (5, 7, and 42); English Heritage/RCHM Aerial Photographic Library (1, 10, 11, 24, 40, 41, 46, 52 (left), 63, 64, 70, 72 (bottom), 73, and 97); Express Newspapers (91); Gifford and Partners (52 (right)); Peter Goodhugh (45); Illustrated London News Picture Library (72 (top)); Ministry of Defence (8); Chis Musson (83); The National Trust, Wessex Region (60); Punch (72 (middle)); The Guardian Newspaper Group (57); Prehistoric Society (16); Salisbury and South Wiltshire Museum (8, 75, and 99); Neville Stokes (67); Wessex Archaeology (13, 56, and 78); and Wiltshire County Building Record (66 and 94).
### ILLUSTRATIONS AND MAPS

1. Aerial view of Stonehenge and the Avenue looking northeast
2. Schematic representation of the main components of an archaeological research framework
3. Location map showing the position of the Stonehenge Landscape within northwest Europe and the topographical form of the Stonehenge Landscape
4. Idealized plan and elevation of Stonehenge by Inigo Jones published in 1655
5. Watercolour by Philip Crocker showing William Cunningham and Sir Richard Colt Hoare supervising Stephen and John Parker opening a round barrow in the Normanton cemetery
6. Plan of Stonehenge by Flinders Petrie, completed in 1877
7. Professor William Gowland supervising the excavation of Stone 56 in 1906
8. A dragline excavator and lorries being used in the excavations at Boscombe Down West in 1949
9. Field evaluation using test-pits for the proposed Stonehenge Visitor Centre at Larkhill
10. Plot of the results from a geophysical survey of the Lesser Cursus in 1993
11. LiDAR image of a section of the Stonehenge Landscape near Fargo Plantation
12. Ploughing across the eastern section of the Stonehenge Avenue, east of King Barrow Ridge, in the 1720s
13. Laser scanner in action recording rock art on the surfaces of Stone 53 at Stonehenge
14. Early map of the Stonehenge Landscape from Sir Richard Colt Hoare's *The ancient history of Wiltshire*
15. Andrew Sherratt's European dialectic model adapted to changing interpretative models of Stonehenge
16. Stuart Piggott's map of Wessex Culture graves in central southern England
17. De-romancing Stonehenge: confronting the socio-political functions of the site in a post-modernist age
18. Rabbit damage to a round barrow in the Winterbourne Stoke barrow cemetery
19. Salisbury Plain, a chalk downland landscape
20. The Stonehenge Landscape
21. Palaeolithic implements from the Stonehenge Landscape
22. Tranchet axes from the Stonehenge Landscape
23. The Coneybury ‘Anomaly’
24. Robin Hood's Ball from the air
25. Long barrows in the Stonehenge Landscape
26. Winterbourne Stoke long barrow and Bowls Barrow
27. Oval barrow in the Stonehenge Landscape
28. Neolithic pottery from the Stonehenge Landscape
29. Schematic phase-plans of Stonehenge 3000–1200 BC
30. Henge monuments in the Stonehenge Landscape
31. Late Neolithic causewayed barrows
32. Wilsford cum Lake barrow G54
33. The Amesbury Archer
34. Flint mines at Durrington
35. King Barrow Ridge ‘Plaque Pit’ and its contents
36. Rock art at Stonehenge
37. Recorded archaeological sites and monuments in the ‘Durrington Zone’
38. Late Neolithic house revealed below Durrington 68
39 Bush Barrow and its grave goods
40 Winterbourne Stoke linear barrow cemetery northeast of Long Barrow Crossroads
41 Plot of the results of a geophysical survey over Stonehenge and the Stonehenge Down Group barrow cemetery
42 Round barrows under excavation
43 Early bronze tools from the Stonehenge Landscape
44 The Wilsford Shaft
45 The Egg, Countess Road
46 Linear earthwork and barrow cemetery on Lake Down
47 Shrewton barrow G5a and later Deverel-Rimbury cremation cemetery
48 The Durnford Hoard of middle Bronze Age metalwork
49 Vespasian’s Camp, Amesbury
50 The Packway Enclosure, Durrington
51 Later prehistoric and Roman settlement at Netheravon
52 Scotland Farm, Winterbourne Stoke
53 Late Iron Age tribal territories in southern Britain
54 Roman civitates in southern Britain
55 Romano-British settlement on Winterbourne Stoke Down
56 Sunken-floor hut and related features at Butterfield Down, Amesbury
57 Postholes possibly supporting a timber gallows at Stonehenge
58 Anglo-Saxon and contemporary kingdoms in southern Britain
59 Amesbury
60 The medieval hundreds of Wiltshire
61 Modern parishes wholly or partly within the Stonehenge Landscape
62 Shrewton: a polyfocal village
63 Aerial view of abandoned watermeadows in the Avon Valley
64 Aerial view of marks left by medieval ridge and furrow cultivation
65 Amesbury Park
66 Countess Farm, Amesbury
67 Shrewton lock-up
68 Milestone beside the modern A344 northeast of Stonehenge
69 Eighteenth-century view showing trippers at Stonehenge
70 Vertical aerial photograph of the area north of Stonehenge, taken on Christmas Eve 1943
71 The Lorraine/Wilson memorial at Airman’s Cross
72 Stonehenge for tourists
73 Aerial photograph of Stonehenge looking east in 1966
74 Modern-day stone circle constructed at Butterfield Down, Amesbury
75 Romano-British corn drier at Butterfield Down, Amesbury
76 Woodland clearance at New King Barrows following the storms of January 1990
77 Cybernetic model of a dynamic social system
78 The Boscombe Bowmen
79 Imported objects found with early Bronze Age burials in the Stonehenge Landscape
80 Stonehenge showing the main astronomical axes and alignments
81 Social territories in Neolithic Wessex
82 Dolerite outcrops at Carn Menyn in the Preseli Hills, Pembrokeshire
83 Hilversum and Wessex biconical style urns from burials in the Stonehenge Landscape
84 Stonehenge: the bluestone oval and surrounding sarsen structures
85 Reconstruction of the Southern Circle at Durrington Walls
86 Stukeley’s view of the Cursus in the early eighteenth century
87 A model of the social use of space around Stonehenge
88 River Avon north of Amesbury
89 Pathways and signing around Stonehenge
90 Test-pit excavated through floodplain deposits beside the River Avon near Amesbury
91 Stonehenge in contemporary humour
92 Durrington 35 round barrow in the Old King Barrow cemetery
93 Geophysical surveys along the Avenue
94 Nineteenth-century Tithe Award map of the Stonehenge area
95 Targeted excavations of low-relief fieldsystem boundaries east of Fargo Plantation
96 Linear evaluation trench at Larkhill
97 Henge monument on Coneybury Hill, Amesbury
98 Researcher visiting Stonehenge in the early eighteenth century
99 Reconstructed of the Beaker burial found in Shrewton 5k
100 Immersive technology providing simultaneous access to virtual worlds

END MAPS

A Stonehenge Landscape showing the distribution and extent of modern settlement, key landscape areas discussed in the text, and the extent of the World Heritage Site
B Stonehenge Landscape showing position and extent of interventions and surveys
C Plot of features revealed by the analysis of aerial photographs
D Stonehenge Landscape showing the position of Scheduled Monuments, Listed Buildings, Conservation Areas, and Registered Parks and Gardens
E Palaeolithic findspots and key Pleistocene deposits
F Mesolithic findspots and key Pleistocene deposits
G Early and middle Neolithic constructions and findspots of related objects
H Later Neolithic constructions and findspots of related objects
I Early Bronze Age constructions and findspots of related objects
J Middle and later Bronze Age constructions and findspots of related objects
K Iron Age constructions and findspots of related objects
L Romano-British occupation areas and main findspots of related objects
M Saxon and early medieval occupation areas, burial places, and findspots of related objects
N Medieval settlements, constructions, and key findspots of related objects
O Post-medieval archaeological features
P Principal nineteenth- and twentieth-century archaeological features
Q Archaeological interventions and surveys connected with proposals for relocating the Stonehenge Visitor Centre and associated facilities
R Archaeological interventions and surveys connected with proposals for improving the A303
TABLES

1 Summary of the main archaeological techniques used in the field evaluation of possible sites for a new Stonehenge Visitor Centre 12
2 Summary of the main types of round barrow represented in the Stonehenge Landscape 63
3 Later medieval settlements and hundreds within the Stonehenge Landscape 82
4 Relationships between defined issues (Section 3) and proposed Objectives (Section 4) 123
