**FORMER RAF CARDINGTON/SHORTSTOWN*****An Archaeological Desk-based Assessment at the Fomer RAF Cardington/Shortstown, Bedford***

John Samuels Archaeological Consultants Newark : John Samuels Archaeological Consultants, 2004, 54pp, figs, tabs, refs

*Work undertaken by:* John Samuels Archaeological Consultants

An archaeological assessment was carried out on the proposed development site. The assessment identified that although no archaeology was known for the site, there was potential for Roman, Saxon, medieval and post-medieval archaeology and structural and ground disturbance associated with the site's former use as an airfield. The assessment concluded that the development would not have had a negative impact on the Grade II Listed airship hangers, located close to the proposed development area. [Au(abr)]

**BREWERS HILL ROAD, DUNSTABLE*****Brewers Hill Road, Dunstable***

Roe, A Leeds : Scott Wilson, 2004, 43pp, pls, figs, tabs, refs

*Work undertaken by:* Scott Wilson

An archaeological assessment was undertaken on a proposed development area. The assessment identified that although the site had been impacted by the railway and post-medieval building, there was a potential for archaeology. The site was identified as being in between prehistoric settlements and potentially contained routes between the settlements. The Roman road Watling Street, was also identified crossing the site and may have had associated features. [Au(abr)]

Web, L & Evans, C Cambridge : Cambridge Archaeological Unit, 2004, 32pp, figs, tabs, refs

*Work undertaken by:* Cambridge Archaeological Unit

An archaeological desk-based assessment was undertaken on the two areas covered by a proposed quarry extension. The assessment identified that area A contained the potential for the occupation of the site from at least the Bronze Age. At least two Roman settlement sites were identified and an Iron date settlement. The potential for the presence of unknown archaeology in area A was identified as being high. Area B was identified as containing Car Dyke/Cranbrook Drain, a possible Roman canal.

The area was also identified as containing marine alluvial deposits from Neolithic/Bronze Age inundations. The potential palaeoenvironmental evidence was considered high. [Au(abr)]

*Archaeological periods represented:* RO, PR, IA

*The Ikon Nightclub, Tombland, Norwich. Historic Building and Archaeological Desk-based Assessment*

AC archaeology Chicklade : AC archaeology, 2004, 42pp, colour pls, figs, tabs, refs

*Work undertaken by:* AC archaeology

A desk-based assessment was undertaken which identified that the study area was once the site of a Saxon and medieval market place. The construction of the present building could be traced back to the 17th century although earlier properties may have existed on the site. In 1920 the building was refurbished, a fire destroyed much of the first floor and all of the attic and roof and then reconstructed in 1952. [AIP]

### **LAND AT STANHOPE INDUSTRIAL PARK, WHARF ROAD**

*An Archaeological Desk-based Assessment of Land at Park, Wharf Road, Stanhope-le-Hope, Essex*

Colchester Archaeological Trust Colchester : Colchester Archaeological Trust, 2004, 18pp, figs, tabs, refs

*Work undertaken by:* Colchester Archaeological Trust

An archaeological assessment was undertaken on the proposed development site. The assessment identified no known archaeology on the site, except for a Second World War bomb decoy. The assessment identified some potential for archaeology at the site due to the site's proximity to Roman/medieval sites and its location on a gravel terrace next to the marsh. [Au(abr)]
