*Results of Test Pit and Trench Evaluation at Land Adjacent to the Fosse Way, Syston, Leicestershire*

Beamish, M Leicester : University of Leicester Archaeological Services, 2002, 38pp, pls, figs, refs

*Work undertaken by:* University of Leicester Archaeological Services

**East Midlands Region**

An evaluation was carried out in advance of mineral extraction. An area of terrace material was found, corresponding to the Fosse Way, a major Roman Road. A late Saxon date from the pre-alluvial ditch implied that this was built partly on terraced material as opposed to alluvial deposits. A late Saxon date has been applied to alluviating conditions and woodland clearance. All archaeological deposits would be destroyed by the proposed development. [Au(adp)]

*Archaeological periods represented:* EM, RO
