FORMER JOHNSONS SEED SITE***Land at Former Johnsons Seeds Site, London Road, Boston***

Snee, J Sleaford : Archaeological Project Services, 2002, 96pp, colour pls, figs, tabs, refs

Work undertaken by: Archaeological Project Services

An archaeological evaluation was carried out on the site. The earliest deposits encountered were dated to the 11th/12th century and were located close to the river. Late medieval pits and channels were identified, associated with the agricultural use of the water meadow. An early post-medieval water tank was identified and domestic dump deposits of the same period were also encountered. Buildings were constructed on the site throughout the post-medieval period, before the site was used for industrial use during the 20th century. [Au(abr)] *SMR primary record number:* 3194

Work undertaken by: University of Durham, Archaeological Services

38 trenches revealed evidence for occupation of the site from the 10th century. Features detected by geophysical survey were in most cases interpreted as palaeochannels. However, ditches aligned in an east-west orientation corresponded with those discovered by geophysics and likely for part of an outlying field system. The visible earthwork investigated in trench 9 could be associated with the early medieval settlement, possibly providing a flood defence barrier. [Au(adp)]
