**BROADWAY THEATRE, BARKING*****Results of Archaeological Evaluation at the Broadway Theatre Site Barking. London Borough of Barking and Dagenham***

Capon, L & Clarke, E Twickenham : AOC Archaeology Group, 2002, 21pp, figs, tabs  
*Work undertaken by:* AOC Archaeology Group

Two archaeological evaluation trenches were excavated in advance of redevelopment of the western front of the Broadway Theatre, Barking. Trench 1 revealed a sequence of 18th century floor surfaces that had been established over an earlier pit. Trench 2 was largely dominated by an extensive cesspit, which contained artefacts that indicate the daily life of the residents of Barking in the 17th century. [Au]

**FORMER PRINCESS BOWL, REVIEW ROAD, DAGENHAM*****Site of the Former Princess Bowl, Review Road, Dagenham, RM9. An Archaeological Evaluation Report***

Sygrave, E London : Museum of London Archaeology Service, 2002, 17pp, figs, refs  
*Work undertaken by:* Museum of London Archaeology Service

An evaluation trench was excavated, and an area within the footprint of the previous Princess Bowl building observed. The results of the field evaluation have helped to refine the initial assessment of the archaeological potential of the site. No archaeological remains were recorded on the site. In the light of revised understanding of the archaeological potential of the site the report concludes the impact of the proposed redevelopment will be low. **HEWETTS QUAY, ABBEY ROAD, BARKING*****Hewett's Quay, Abbey Road, Barking. An Archaeological Evaluation and Excavation Report***

Hounsell, D, Grant, J & Murray, J Hertford : Hertfordshire Archaeological Trust, 2002, 28pp, pls, figs, tabs  
*Work undertaken by:* Hertfordshire Archaeological Trust

The field evaluation, of four trenches, revealed substantial later truncation of the site, in addition to evidence of the 19th and 20th century riverside wharves. Trench 3, near Abbey Road frontage revealed evidence of post-medieval sumps and tow e/w aligned channels of medieval date leading to the river. Trench 4, also close to the Abbey Road revealed a further E/W aligned channel with evidence of wooden revetting along its southern edge. Its lower fills contained quantities of 12th century pottery, and its upper fill contained High Medieval sherds. A further small, irregular pit contained 12th century sherds. EH GLAAS subsequently required full excavation of the channel as it occurred within Trench 4, which confirmed the dating of the feature and established the revetting to be largely uniform along the line of the channel.[Au(adp)] *SMR primary record number:* LAG 01/115
