13-15 MOXON STREET/18-20 TAPSTER STREET, BARNET*13-15 Moxon Street & 18-20 Tapster Street, Barnet. London Borough of Barnet. An Archaeological Evaluation Report*

Mackinder, T London : Museum of London Archaeology Service, 2002, 21pp, figs, tabs, refs

Work undertaken by: Museum of London Archaeology Service

Two archaeological evaluation trenches were investigated on the site. In trench 1, two brick cellars that fronted onto the Tapster Street frontage were recorded, in addition there was a brick well and two brick-lined cess pits, which were 19th century in date. There were also several post-medieval land raising dumps. In Trench 2, an undated shallow cut into the natural gravel was present. This may have been a quarry cut or represent terracing. It was sealed by an undated soil horizon, above which was a post-medieval land raising dump. In light of these results, the report concludes the proposed redevelopment will have an impact on post-medieval deposits. [Au(abr)] *SMR primary record number:* LAG/02/215

BIBSWORTH MANOR, 80 EAST END ROAD*Bibsworth Manor, 60 East End Road, London. N3 2SY. London Borough of Barnet. A Geoarchaeological Auger Hole Survey*

Lam, J London : Museum of London Archaeology Service, 2002, 32pp, pls, figs, tabs, refs

Work undertaken by: Museum of London Archaeology Service

Fourteen auger holes were drilled, which formed four transects across the predicted line of the moat. The transects lay within the footprint of the proposed synagogue, but outside the limit of the Scheduled Ancient Monument (SAM). The archaeological auger survey has confirmed the predicted line of the moat and bank illustrated in the Archaeological Impact Assessment (Bowsher 1999) and has been able to refine the alignment of the feature to some extent. It is likely that the moat follows a line that runs slightly obliquely across the footprint of the proposed building. Thus, in the southern part of the school footprint, it is likely that the moat lies almost entirely within the SAM with the bank extending below the footprint of the building itself. HENDON CAMPUS, MIDDLESEX UNIVERSITY, HENDON*New Learning Resources Centre, Hendon Campus, Middlesex University, Hendon. London Borough of Barnet. Archaeological Evaluation*

Stevens, T Twickenham : AOC Archaeology Group, 2002, 14pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

An archaeological evaluation was undertaken ahead of proposed developments at the Hendon Campus of Middlesex University, on the 26th and 27th November 2002. Four machine-excavated trenches were opened, but no archaeological finds or features were noted. No further work is deemed necessary. [Au] *SMR primary record number:* LAG/02/050

LAND OFF WESTFIELD CLOSE, KINGSBURY***An Archaeological Evaluation on Land off Westfield Close, Kingsbury, London NW9***

Hard, T Twickenham : AOC Archaeology Group, 2002, 15pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

The evaluation involved the opening of two machine-excavated trenches situated within the footprints of the proposed buildings. With the exception of two potential plough scars located toward the northern end of the site, no archaeological features or horizons were recorded in either of the trenches. The natural deposit across the site was mid brownish yellow silty clay. No further work is required. [Au(adp)]

SUMMIT HOUSE, BARNET***Summit House, Moon Lane, Barnet, EN5. London Borough of Barnet. An Archaeological Evaluation Report***

Bluer, D London : Museum of London Archaeology Service, 2002, 19pp, figs, tabs, refs

Work undertaken by: Museum of London Archaeology Service

Following the recommendations of the Greater London Archaeology Advisory Service (LASS) one evaluation trench, measuring 10m by 2m, was excavated on the site. It showed that topsoil directly overlay natural gravels and it is therefore concluded that the proposed redevelopment will have no archaeological implications, and that no further archaeological input into the project is necessary. THE STERNBERG CENTRE, 80 EAST END ROAD***The Sternberg Centre, 80 East End Road, London NW2. Archaeological Evaluation***

Bashford, R Oxford : Oxford Archaeology, 2002, 12pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

The evaluation was carried out in response to the proposed burial plot of Sir Sigmund Sternberg, principal benefactor of the Sternberg Centre. The single trench revealed a post-medieval north-east to south-west aligned boundary ditch and a redundant 20th century brick manhole. [Au(abr)]
